BILLING CODE 4000-01-P

DEPARTMENT OF ENERGY

Renewal of a Currently Approved Information Collection for the Energy Efficiency and Conservation Block Grant Financing Programs

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice and request for comments.

SUMMARY: The Department of Energy (DOE), pursuant to the Paperwork Reduction Act of 1995, intends to extend for three years a currently approved collection of information with the Office of Management and Budget (OMB). The information collection request, Energy Efficiency and Conservation Block Grant Program, was

previously approved under OMB Control No. 1910-5150 and its current expiration date is September 30, 2021. The proposed collection will collect information on the status of Grantee activities, expenditures, and results, to ensure that program funds are being used appropriately, effectively, and expeditiously.

DATES: Comments regarding this collection must be received on or before November 4, 2021. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, please advise the OMB Desk Officer of your intention to make a submission as soon as possible. The Desk Officer may be telephoned at (202) 395-4650.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular

information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function, or to: James Carlisle, EE-5W, U.S. Department of Energy, 1000 Independence Ave. SW, Washington, DC 20585, Email: james.carlisle@ee.doe.gov.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to: James Carlisle, U.S. Department of Energy, 1000 Independence Ave. SW, Washington, DC 20585, Phone: (202) 287-1724, Fax: (412) 386-5835, Email: james.carlisle@ee.doe.gov.

SUPPLEMENTARY INFORMATION: This information collection request contains: (1) OMB No.: 1910-5150; (2) *Information Collection Request Title:* Energy Efficiency and Conservation Block Grant Program Financing Programs; (3) *Type of Review:* Renewal

of a Currently Approved Information Collection; (4) *Purpose*: To collect information on the status of Financing Program activities, expenditures, and results, to ensure that program funds are being used appropriately, effectively and expeditiously; (5) *Annual Estimated Number of Respondents*: 54; (6) *Annual Estimated Number of Total Responses*: 101; (7) *Annual Estimated Number of Burden Hours*: 303; (8) *Annual Estimated Reporting and Recordkeeping Cost Burden*: \$12,120. Respondents, total responses, burden hours and the annual cost burden have all been reduced over time because of the retirement of grants, fewer programs and a lessened burden on reporting and recordkeeping costs.

Statutory Authority: Title V, Subtitle E of the Energy Independence and Security Act (EISA), Public Law 110–140 as amended (42 U.S.C. 17151 *et seq.*).

Signing Authority

This document of the Department of Energy was signed on September 27, 2021, by Kelly Speakes-Backman, Principal Deputy Assistant Secretary and Acting Assistant Secretary for Energy Efficiency and Renewable Energy, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on September 29, 2021.

Treena V. Garrett,
Federal Register Liaison Officer, U.S.
Department of Energy.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

National Nuclear Security Administration

Supply of Molybdenum-99 (Mo-99) Produced Without the Use of Highly Enriched Uranium (HEU)

AGENCY: National Nuclear Security Administration (NNSA), Department of Energy (DOE).

ACTION: Request for information (RFI).

SUMMARY: DOE, in accordance with Section 3174 of the American Medical Isotopes Production Act of 2012 (AMIPA), is preparing for a Secretarial certification regarding the sufficiency of supply of non-HEU based Mo-99. DOE is seeking public input as part of its certification development process and analysis to determine the sufficiency of Mo-99 supply to meet U.S. patient needs.

DATES: DOE will accept comments, data, and information in response to this RFI on or before November 4, 2021.

ADDRESSES: Interested persons may submit comments via email to the Office of Conversion at OfficeofConversion@nnsa.doe.gov.

Although DOE has routinely accepted public comment submissions through a variety of mechanisms, including postal mail and hand delivery/courier, the Department has found it necessary to make temporary modifications to the comment submission process in light of the ongoing coronavirus (COVID–19) pandemic. DOE is currently accepting only electronic submissions at this time.

If a commenter finds that this change poses an undue hardship, please contact the Office of Conversion at OfficeofConversion@nnsa.doe.gov to discuss the need for alternative arrangements. Once the COVID–19 pandemic health emergency is resolved, DOE anticipates resuming all of its regular options for public comment submission, including postal mail and hand delivery/courier. No facsimiles (faxes) will be accepted.

Instructions: All submissions received must include the agency name and title for this RFI in Microsoft Word or PDF file format and avoid the use of special characters or any form of encryption.

FOR FURTHER INFORMATION CONTACT: Requests for additional information may be sent to Max Postman in the Office of Conversion at 240–246–5564, Max.Postman@nnsa.doe.gov.

SUPPLEMENTARY INFORMATION:

I. Authority and Background

The U.S. medical community depends on a reliable supply of the radioisotope Mo-99 for nuclear medical diagnostic procedures. Approximately 80 percent of these procedures depend on the use of technetium-99m (Tc-99m), a decay product of Mo-99. Tc-99m is used in over 40,000 medical procedures every day in the United States. Its primary uses include diagnosing heart disease and cancer, as well as studying organ structure and function. Historically, the United States has not had the capability

to produce Mo-99 domestically and, until 2018, imported 100 percent of its supply from international producers, some of which supply was produced using targets fabricated with proliferation-sensitive HEU.

AMIPA (Subtitle F, Title XXXI of the National Defense Authorization Act for Fiscal Year 2013 (Pub. L. 112–139)), enacted on January 2, 2013, amended Section 134 of the Atomic Energy Act of 1954 (42 U.S.C. 2160d) by striking subsection c. and inserting language that prohibits the Nuclear Regulatory Commission (NRC) from issuing a license for the export of HEU from the United States for the purposes of medical isotope production, effective seven years after enactment of AMIPA, subject to a certification regarding the sufficiency of Mo-99 supply in the United States.

Section 3174 of AMIPA requires the Secretary of Energy to either jointly certify, with the Secretary of Health and Human Services, that there is a sufficient supply of Mo-99 produced without the use of HEU available to meet U.S. patient needs, and that it is not necessary to export U.S.-origin HEU for the purposes of medical isotope production in order to meet U.S. patient needs, or, to unilaterally certify that there is insufficient global supply of Mo-99 produced without the use of HEU available to satisfy the domestic market, and that the export of U.S.-origin HEU for the purposes of medical isotope production is the most effective temporary means to increase the supply of Mo-99 to the domestic U.S. market, thereby delaying the effective date of the export license ban for up to six years.

DOE published a **Federal Register** notice (84 FR 65378) on November 27, 2019 requesting public comment on the status of Mo-99 supplies for U.S. patients in preparation for a Secretarial certification regarding the sufficiency of supply of non-HEU based Mo-99. The Secretary of Energy certified on January 2, 2020, that, at the time, there was an insufficient global supply of Mo-99 produced without the use of HEU and that the export of U.S.-origin HEU for the purposes of medical isotope production was the most effective temporary means to increase the supply of Mo-99 to the domestic U.S. market. This certification was published in the **Federal Register** on January 21, 2020 (85 FR 3362). This certification was effective for no more than two years from the effective date of January 2, 2020. The **Federal Register** notice stated that DOE would conduct periodic reviews of the domestic U.S. and global Mo-99 markets and would work toward a certification to Congress regarding the
