

mitigation and the additional measures we recommend in the EIS.

The U.S. Environmental Protection Agency (EPA), U.S. Department of Transportation, U.S. Army Corps of Engineers, New York City Mayor's Office, and New York City Department of Environmental Protection participated as cooperating agencies in the preparation of the EIS. Cooperating agencies have jurisdiction by law or special expertise with respect to resources potentially affected by the proposal and participate in the NEPA analysis. Although the cooperating agencies provided input to the conclusions and recommendations presented in the EIS, the agencies will present their own conclusions and recommendations in their respective Records of Decision for the project.

The final EIS addresses the potential environmental effects of the following project facilities:

- Construction and operation of approximately 15.2 miles of new 30-inch-diameter pipeline and 4.8 miles of 42-inch-diameter pipeline;
- Abandonment of 8.95 miles of existing 12-, 20-, and 24-inch-diameter pipeline;
- Installation of seven new metering and regulating (M&R) stations;
- Modifications to four existing compressor stations and one existing M&R station; and
- Modifications and installations of associated valves and piping.

The FERC staff mailed copies of the EIS to federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; local newspapers and libraries in the Project area; intervenors to the FERC's proceeding; and potentially affected landowners and other interested individuals and groups. Paper copy versions of the EIS were mailed to those specifically requesting them; all others received a CD version. In addition, the EIS is available for public viewing on the FERC's Web site (www.ferc.gov) using the eLibrary link. A limited number of copies are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference Room, 888 First Street NE., Room 2A, Washington, DC 20426. (202) 502-8371.

In accordance with the Council on Environmental Quality's (CEQ) regulations implementing NEPA, no agency decision on a proposed action may be made until 30 days after the EPA publishes a notice of availability of the final EIS in the **Federal Register**. However, the CEQ regulations provide

an exception to this rule when an agency decision is subject to a formal internal appeal process that allows other agencies or the public to make their views known. In such cases, the agency decision may be made at the same time the notice of the final EIS is published, allowing both periods to run concurrently. The Commission decision for this proposed action is subject to a 30-day rehearing period.
