

EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: As required by the Clean Air Act, EPA has regulations establishing emission standards and other requirements for various classes of vehicles and engines. These regulations require that compliance be demonstrated prior to EPA granting a "Certificate of Conformity". EPA charges fees for administering this certification program; in 2004 the fees program was expanded to include non-road categories of vehicles and engines, such as several categories of marine engines, locomotives, non-road recreational vehicles, and many non-road compression-ignition and spark-ignition engines. Manufacturers and importers of covered vehicles and engines are required to pay the applicable certification fees prior to their certification applications being reviewed. This ICR estimates the paperwork burden of complying with this fees requirement.

Burden Statement

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 290.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: 7.35.

Estimated total annual burden hours: 2,132 hours.

Estimated total annual costs: \$85,541. This includes an estimated burden cost of \$76,840 and an estimated cost of \$8,701 for maintenance and operational costs.

Dated: September 6, 2006.

Janet Cohen,

Acting Director, Compliance and Innovative Strategies Division.

**DEPARTMENT OF HEALTH AND
HUMAN SERVICES**

**Office of the National Coordinator for
Health Information Technology;
American Health Information
Community Confidentiality, Privacy,
and Security Workgroup Meeting**

ACTION: Announcement of meeting.

SUMMARY: This notice announces the
second meeting of the American Health
Information Community ("the
Community") Confidentiality, Privacy,
and Security Workgroup in accordance
with the Federal Advisory Committee
Act (Pub. L. No. 92-463, 5 U.S.C., App.)

DATES: September 29, 2006 from 10 a.m.
to 4:30 p.m.

Place: Hubert H. Humphrey Building
(200 Independence Avenue, SW.,
Washington, DC 20201), Conference
room 800 (you will need a photo ID to
enter a Federal building).

Status: Open.

Purpose: At this meeting, the
Community Confidentiality, Privacy,
and Security Workgroup will receive
information on identity proofing and
user authentication as it relates to the
breakthroughs currently being discussed
by the Community's Consumer
Empowerment, Chronic Care, and
Electronic Health Record Workgroups.

The meeting will be conducted in
hearing format, and the Workgroup will
invite representatives who can provide
information relevant to identity proofing
and user authentication as it relates to
the breakthroughs currently being
discussed by the Community's
Consumer Empowerment, Chronic Care,
and Electronic Health Record
Workgroups. The format for the meeting

will include multiple invited panels and
time for questions and discussion. The
meeting will include a time period
during which members of the public
may deliver brief (3 minutes or less) oral
public comment. Slots for oral
comments by the public will be filled on
the day of the meeting as time permits.
To submit comments via e-mail, please
send them to Michele.Rollins@hhs.gov
(to ensure that your e-mail is received
and appropriately filed, we ask that
your explicitly put "*CPS Public
Comment*" in the subject line of your
e-mail) or mail your comments to
Michele Rollins, Office of the National
Coordinator (ONC), 330 C Street, SW.,
Suite 4090, Washington, DC 20201.

SUPPLEMENTARY INFORMATION: The
Community's Confidentiality, Privacy,
and Security (CPS) Workgroup will
undertake steps to evaluate instances
where health information technology
(health IT) has shifted the CPS
paradigm, as well as where policy (due
to evolving technology) have become
unclear or allow for varied
interpretation.

The first two issues before the CPS
workgroup (identity proofing and user
authentication) were chosen because of
their foundational importance to any
security initiative. Inextricably linked,
both issues need discussion in order to
determine how authorized entry is
governed to a new technology product,
service, or infrastructure. In typical
workflows, identity proofing and user
authentication are the first of many
processes completed in health care
environments, followed shortly
thereafter by other more complex
activities such as access control, data
management, information matching and
transmission, and information assurance
(data integrity, business continuity,
etc.).

There is no one solution for identity
proofing and user authentication. As
health IT evolves, we expect that
methods for identity proofing and user
authentication will evolve as well.
Certain types of health IT products may
require more stringent methods while
others may not, and understanding
these tradeoffs will be critical to
determining CPS policies. Deciding how
to prove (with some degree of
confidence) that someone is who they
claim to be, followed by a repeatable
authentication process, are necessary
steps to ensure that an authorized
person or entity can access a health IT
product or service in a private and
secure manner.

In an effort to inform members of the
public responding to the questions
posed for testimony, we are defining
