Discussion

The subject advisory circular describes one way to show compliance to Title 14 of the Code of Federal Regulations part 23 for type certification of Joint Aviation Regulations—Very Light Airplanes if the type certification will be for either a part 23 Normal or Utility Category Type Certificate or a "special class" airplane, following § 21.17(b).

Material in the AC is neither mandatory nor regulatory in nature and does not constitute a regulation. In addition, the material is not to be construed as having any legal status and should be treated accordingly.

Issued in Kansas City, Missouri on January 28, 2003.

Michael Gallagher,

Manager, Small Airplane Directorate, Aircraft Certification Service.

SUPPLEMENTARY INFORMATION: Pursuant to the Privacy Act of 1974, as amended, 5 U.S.C. 552a, the Financial Management Service (FMS) is proposing to establish a new system of records entitled "Collection Records—Treasury/FMS .017." FMS collects more than \$2 trillion in Federal receipts through a network of more than 10,000 financial institutions. It manages the collection of Federal receipts such as taxes, customs duties, loan repayments, fines, fees, and lease payments. Citizens and others make payments to the Federal government in a variety of ways. Many people mail a check to a post office box, known as a "lockbox," which is managed by a financial institution as the financial agent of the Department of the Treasury. Some people pay over-the-counter for goods and services at the time of receipt of those goods or services. Others make payments electronically by credit card, debit card, or by authorizing the government to debit their bank account. FMS offers a variety of cost-efficient ways by which Federal agencies may collect receipts due from the public to the government while ensuring that information pertaining to such collections remains secure and confidential.

FMS continually seeks to modernize the government collections program. Through its electronic money program, FMS is initiating new collection mechanisms using the Internet or other communications networks to help Federal agencies modernize their collection activities. For example, through an Internet site known as "Pay.gov," a person can authorize a payment to the government via the Internet. Electronic Federal Tax Payment System, or "EFTPS," allows taxpayers to authorize the payment of certain types of taxes on-line. In both cases, the payor submits information to a government Web site, which allows the government to debit the person's bank account or charge the person's credit card. The process used by the government and the information collected from payors is similar to how the private sector handles commercial
