SUPPLEMENTARY INFORMATION:

Reclamation is issuing this notice
pursuant to the National Environmental
Policy Act of 1969, as amended (NEPA),
42 U.S.C. 4321 *et seq.*; the Council on
Environmental Quality's (CEQ)
regulations for implementing NEPA, 43
CFR parts 1500 through 1508; and the
Department of the Interior's NEPA
regulations, 43 CFR part 46.

Background

Under the Omnibus Public Land
Management Act of 2009 (Omnibus
Act), Public Law (Pub. L.) 111–11,
Section 9001, Congress authorized
Reclamation to conduct feasibility
studies on projects that address water
shortages within the Boise River Basin
System and that are considered
appropriate for study by Reclamation's
2006 Boise/Payette Water Storage
Assessment Report (2006 Assessment
Report). The action proposed was
identified in the 2006 Assessment
Report as appropriate for study and is
the subject of an ongoing feasibility
study pursuant to the Omnibus Act and
the Water Infrastructure Improvements
for the Nation (WIIN) Act of 2016. The
WIIN Act authorizes Reclamation to
enter into agreements with requesting
states or subdivisions thereof to design,
study, construct, or expand federally
owned storage projects, and Congress
has specified that this project be studied
under WIIN Act authority. Public Law
114–322, Section 4007.

The Bureau of Reclamation, in
partnership with the Idaho Water
Resource Board (IWRB), proposes to
raise Anderson Ranch Dam 6 feet,
raising the top of the reservoir pool from
the present elevation of 4,196 feet to
4,202 feet, allowing the ability to
capture and store approximately 29,000
additional acre-feet of water. This new
space would allow Reclamation to
capture additional water when available
during wet years for supplemental
supply and to hold over for use during
dry years. Potential spaceholders
include existing Reclamation
contractors and IWRB, which could in
turn contract water to existing Water
District 63 water users and/or may offer
water through the Idaho water supply
bank's Water District 63 rental pool.

Proposed dam structure modifications
include:

- Raising the earthen embankment
dam crest by 6 feet.

- Demolishing the existing spillway crest structure and bridge.
- Removing, rehabilitating, and re-installing the existing radial gates.
- Constructing a new spillway crest structure and bridge.
- Constructing a new two-lane road across the dam.

The existing road across the dam would be closed during construction. An alternative route has been identified that would provide safe public transport. There would likely be a reservoir restriction of 6–10 feet during spillway construction.

In addition to work on the dam, the project would include modification to structures around the reservoir such as culverts, bridges, and recreation sites.

Reclamation is not presently aware of any known or possible Indian Trust Assets or environmental justice issues associated with the proposed action but requests any information relative to this issue be submitted during the scoping period.

Reclamation intends to complete an EIS for this project pursuant to the National Environmental Policy Act to study the potential environmental effects of the proposal and a reasonable range of alternatives designed to respond to the purpose and need for the project, as well as a no-action alternative. The scoping process and public open houses identified in this notice are intended to inform the public about the project and to request public and agency comment to identify significant issues or alternatives to be addressed in the EIS.

Special Assistance for Public Scoping and Open House Meetings

If special assistance is required to participate in the public scoping and open house meetings, please contact Ms. Megan Sloan, Bureau of Reclamation, Snake River Area Office, 230 Collins Road, Boise, ID 83702; telephone (208) 383–2222; facsimile (208) 383–2210; email BOR-SRA-BoiFeasibility@usbr.gov. Persons who use a telecommunications device for the deaf may call the Federal Relay Service (FedRelay) at 1–800–877–8339 TTY/ASCII to contact the above individual during normal business hours or to leave a message or question after hours. You will receive a reply during normal business hours. All meeting facilities are physically accessible to people with disabilities.
