

understand its risks and the potential impact of stressful events and circumstances on its financial condition.² On May 17, 2012, the OCC, along with the Federal Deposit Insurance Corporation (FDIC) and the Board of Governors of the Federal Reserve (FRB), published guidance on the use of stress testing as a means to better understand the range of a banking organization's potential risk exposures.³ The OCC is now seeking to renew the information collection associated with that guidance.

The guidance provides an overview of how a banking organization should structure its stress testing activities to ensure those activities fit into the banking organization's overall risk management. The purpose of the guidance is to outline broad principles for a satisfactory stress testing framework and describe the manner in which stress testing should be used. While the guidance is not intended to provide detailed instructions for conducting stress testing for any particular risk or business area, it does describe several types of stress testing activities and how they may be most appropriately used by banking organizations. The guidance also does not explicitly address the stress testing requirements imposed upon certain companies by section 165(i) of the Dodd-Frank Wall Street Reform and Consumer Protection Act.⁴
