Policy Justification

Kuwait—PATRIOT Advanced Capability (PAC-3) Missiles

The Government of Kuwait has requested a possible sale of 60 PATRIOT Advanced Capability (PAC-3) Missiles, 4 PATRIOT radars, 4 PATRIOT Engagement Control Stations, 20 PATRIOT Launching Stations, 20 Information Coordination Centrals, 10 Electric Power Plants, communication and power equipment, personnel training and training equipment, spare and repair parts, facility design and construction, publications and technical documentation, U.S. Government and contractor technical and logistics personnel services and other related elements of program and logistics support. The estimated cost is \$4.2 billion.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country which has been, and continues to be, an important force for political stability and economic progress in the Middle East.

Kuwait will use the PAC-3 missiles and equipment to improve its missile defense capability, strengthen its homeland defense, and deter regional threats. The proposed sale of PAC-3

missiles and support will enhance Kuwait's interoperability with the U.S. and its allies, making it a more valuable partner in an increasingly important area of the world. Kuwait, which already has PAC-3 in its inventory, will have no difficulty absorbing these additional missiles and support into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors will be Raytheon Corporation in Tewksbury, Massachusetts; and Lockheed Martin Missiles and Fire Control in Dallas, Texas. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require the assignment of three contractor representatives to Kuwait on a temporary basis for program, technical support, and management oversight.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 12-29

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The PATRIOT Air Defense System contains Confidential hardware components and critical/sensitive technology. The PATRIOT Advance Capability-3 (PAC-3) Missile Four-Pack is classified Confidential, and the improved PAC-3 launcher hardware is Unclassified. The modification kits requested represent significant technological advances for the existing Kuwaiti PATRIOT system capabilities. With the incorporation of the PAC-3, Configuration-3 (PAC-3/C-3) improvements, the PATRIOT system will continue to hold a significant technology lead over other surface-to-air missile systems in the world.

2. The PAC-3/C-3 sensitive/critical technology is primarily in the area of design and production know-how and primarily inherent in the design, development and/or manufacturing data related to the following components:

Radar Enhancement Phase III (REP-3)
Exciter Assemblies
Radar Digital Processor
Modern Adjunct Processor
REP-3 Traveling Wave Tube
Classification, Discrimination, and Identification-3 (CDI-3) Digital Signal Processor

CDI-3 Analog/Digital Converters
Hardware-in-the-Loop and Digital Simulations

Surface Acoustic Wave Oscillators

PAC-3 Missile Guidance Processor Unit

PAC-3 Seeker

PAC-3 Missile Software

Selected areas of the PATRIOT Ground Equipment and software

3. Information on vulnerability to electronic countermeasures and counter-counter measures, system performance capabilities and effectiveness, survivability and vulnerability data, PAC-3 missile seeker capabilities, non-cooperative target recognition, low observable technologies, select software/software documentation and test data are classified up to and including Secret.

4. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.
