SUPPLEMENTARY INFORMATION:

Title: Specimen Submission.

OMB Number: 0579-0090.

Type of Request: Extension of approval of an information collection.

Abstract: The United States Department of Agriculture (USDA) is responsible for, among other things, preventing the interstate spread of animal diseases and for eradicating such diseases from the United States when feasible.

Disease prevention is the most effective method for maintaining a healthy animal population and enhancing international trade of animals and animal products. The Veterinary Services (VS) program of USDA's Animal and Plant Health Inspection Service is responsible for carrying out this disease prevention mission.

Disease prevention is accomplished with an effective disease surveillance program, which is conducted by VS. The VS Form 10-4 and its supplemental sheet (VS Form 10-4A) are critical components of our disease surveillance mission. They are routinely used whenever specimens (such as blood, milk, tissue, or urine) from any animal (including cattle, swine, sheep, goats, horses, and poultry) are submitted to our National Veterinary Services Laboratories for disease testing.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as

affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.25 hours per response.

Respondents: State veterinary officials, accredited veterinarians, animal health technicians and other personnel who are qualified to collect and submit specimens for laboratory analysis, and herd owners.

Estimated annual number of respondents: 12,000.

Estimated annual number of responses per respondent: 3.

Estimated annual number of responses: 36,000.

Estimated total annual burden on respondents: 9,000 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 17th day of July 2003.

Peter Fernandez,

Acting Administrator, Animal and Plant Health Inspection Service.
