

U.S. waters, as necessary based on the nature and scope of the proposed project.

As per 2 CFR part 200.329, all recipients of non-construction federal financial assistance awards are required to provide performance (technical) reports to the agency at intervals no less frequently than annually and no more frequently than quarterly in order for the agency to properly monitor the award and meet oversight responsibilities. The awarding agency must use OMB-approved common forms for this purpose or seek permission for program-specific forms that will collect the required data elements. The Coral Reef Conservation Program seeks OMB approval to revise this information collection to require use of a program-specific form for semi-annual reporting and an annual form for tracking specific indicators. These indicators align with the new Coral Reef Conservation Program Strategic Plan (2018; https://www.coris.noaa.gov/activities/strategic_plan2018) and will be used to track national progress toward these strategic goals through 2040. The program-specific form for semi-annual reporting will be a revised version of what is currently in use and will standardize reporting across projects.
