

During the evaluation of offers on a construction contract, the contracting officer reviews the offeror's PLA to determine if it conforms with all statutes, regulations, and Executive Orders.

- *FAR 52.222–34, Project Labor Agreement.* When a PLA is required for a construction contract, this clause requires the contractor to maintain the PLA in a current state throughout the life of the contract. This recordkeeping requirement is necessary for the Government to ensure that the contractor stays a party to the PLA during the life of the construction contract.

- *FAR 52.222–46, Evaluation of Compensation for Professional Employees.* This provision requires offerors to submit for evaluation a total compensation plan setting forth proposed salaries and fringe benefits for professional employees working on the contract. The Government will use this information to determine if professional employees are compensated fairly and properly. Plans indicating unrealistically low professional employees' compensation may be assessed adversely as one of the factors considered in making a contract award.
