SUPPLEMENTARY INFORMATION:

I. Abstract

The Advance Monthly Retail Sales Survey (MARTS) provides an early indication of current retail sales activity at the United States level. Policymakers such as the Federal Reserve Board need to have the most timely estimates in order to anticipate economic trends and act accordingly. The Bureau of Economic Analysis (BEA), the Council of Economic Advisors (CEA), and other government agencies and businesses use the data to formulate economic policy and make decisions. These estimates have a high BEA priority because of their timeliness. There would be approximately a month delay in the availability of these data if this survey were not conducted. Data are collected monthly from small, medium, and large size businesses, selected using a stratified random sampling procedure. The MARTS sample is re-selected periodically, generally at two year intervals. Small and medium-size retailers are requested to participate for those two years, after which they are replaced with new panel members. Smaller firms have less of a chance for selection due to our sampling procedure. Firms canvassed in this survey are not required to maintain additional records and carefully prepared estimates are acceptable if book figures are not available. The change in the response burden is a result of a larger sample size. The sample was increased from 4,100 to 4,500 to improve the quality of the estimates.

This request is for the clearance of four similar report forms SM-44(00)A; SM-44(00)AE; SM-44(00)AS & SM-72(00)A which will be replacing the form B-104 previously used to collect data in this survey on the Standard Industrial Classification (SIC) basis. The new forms will enable us to collect information on the North American Industry Classification System (NAICS) basis. All forms request similar data items but a variety of forms are needed to address either a firm's specific kind-of-business or to ask if and when the firm began selling through an Internet site and to separately report the value of any Internet sales.

II. Method of Collection

We will collect this information by mail, FAX and telephone follow-up.

[Docket 46-2000]

Foreign-Trade Zone 86—Tacoma, Washington Application For Foreign-Trade Subzone Status Matsushita Kotobuki Electronics Industries of America, Inc. (9- and 13-inch Television/Video Cassette Recorder Combination Units) Vancouver, Washington

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Port of Tacoma, Washington, grantee of FTZ 86, requesting special-purpose subzone status for the manufacturing and warehousing facilities (9- and 13-inch television/video cassette recorder combination ("TV/VCR") units) of Matsushita Kotobuki Electronics Industries of America, Inc. (MKA), located at sites in Vancouver, Washington. The application indicates that MKA's Vancouver facilities also produce TV/VCR units in sizes larger than the 9- and 13-inch units, but that the company is not seeking authority to produce the larger sizes under FTZ procedures. The application was submitted pursuant to the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR part 400). It was formally filed on August 2, 2000.

The MKA facilities are located at four sites in Vancouver, Washington (five buildings and two trailers, 427,300 sq. ft. total): *Site #1* (one manufacturing building, one warehouse building and two office trailers/282,800 sq. ft.)—located at 2001 Kotobuki Way; *Site #2* (one warehouse building/8,500 sq. ft.)—located across the street from 2001 Kotobuki Way; *Site #3* (one warehouse building/108,000 sq. ft.)—located at 3201 Lower Port Road; and *Site #4* (one warehouse building/28,000 sq. ft.)—located at 1923 Elevator Way.

The facilities (475 full-time employees and 160-180 contract employees) are used for the assembly and warehousing of MKA's TV/VCR units. Some of the components used in the manufacturing process are purchased from abroad, and account for 72% to 73% of finished product value. The imported components and their duty rates are as follows: 9-inch cathode
