SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at http://www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. Abstract: EPA is collecting, on a voluntary basis, data from states and territories on their progress toward substantial implementation of protection strategies for all community water systems (CWSs). The information to be collected will help states/tribes and EPA understand the progress toward the Agency's goal of increasing the number of CWSs (and the populations they serve) with minimized risk to public health through development and implementation of source water protection strategies for source water areas. In April of 2015, the National Water Program published guidance for meeting the water-related goals in the FY 2014-2018 EPA Strategic Plan. In keeping with this guidance, EPA specifically tracks the percentage of all CWSs that are implementing source water protection and the percentage of the total population which is served by those systems.

Form Numbers: None.

Respondents/affected entities: Entities affected by this action are state and territorial governments.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 51 (total).

Frequency of response: Annual. Total estimated burden: 342 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$14,853 (per vear).

Changes in the Estimates: There is a decrease of 1,066 hours in the total estimated burden from the existing approved ICR. This decrease is because source water protection programs are maturing. State databases are fully developed and tracking is routine compared to the burden and costs calculated for the existing ICR.

Courtney Kerwin,

Acting Director, Collection Strategies Division.
