Proposed Project: National Outcome Measures (NOMs) for Consumers Receiving Mental Health Services—New

The mission of SAMHSA's Center for Mental Health Services (CMHS) is to treat mental illnesses by promoting mental health and by preventing the development or worsening of mental illness when possible. Congress created CMHS to bring new hope to adults who have serious mental illnesses and to

children with serious emotional disorders.

The purpose of this proposed data activity is to promote the use of consistent measures among CMHS grantees and contractors funded through the Program of Regional and National Significance (PRNS) and Children's Mental Health Initiative (CMHI) budget lines. The common National Outcome Measures recommended by CMHS are a result of extensive examination and recommendations, using consistent criteria, by panels of staff, experts, and grantees. Wherever feasible, the proposed measures are consistent with or build upon previous data development efforts within CMHS. This activity will be organized to reflect and support the domains specified for SAMHSA's NOMs. The use of consistent measurement for specified

outcomes across CMHS-funded projects will improve the ability of SAMHSA and CMHS to respond to the Government Performance and Results Act (GPRA) and the Office of Management and Budget Program Assessment Rating Tool (PART) evaluations.

A separate data collection form will be used for adults and children but will be parallel in design. NOMs data will be collected at baseline with a periodic reassessment being conducted every six months as long as the client remains in treatment. The proposed data collection will cover eight of the ten domains in NOMs. The Cost-Effectiveness and Evidence-Based Practices domains are under development. Completion of these domains will require input from other sources and is anticipated for Summer 2007.

In addition to questions asked of clients related to the NOMs domains, programs will be required to abstract

information from client records on the services received.
