Responsible Officials

The Responsible Officials will be Amy Reid, Acting Forest Supervisor, Eldorado National Forest, and Jason Kuiken, Forest Supervisor, Stanislaus National Forest.

Scoping Comments and the Objection Process

This notice of intent initiates the scoping process, which guides the development of the environmental impact statement. In this process the Agency is requesting comments on potential alternatives and impacts, and identification of any relevant information, studies, or analyses of any kind concerning impacts affecting the quality of the human environment. There will be up to two public workshops during the scoping period.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the final EIS; therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions. Commenting during scoping and any other designated opportunity to comment provided by the Responsible Official as prescribed by the applicable regulations will also govern eligibility to object once the final EIS and draft Record of Decision has been published. Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered; however, they will not be used to establish eligibility for the objection process.

Objections will be accepted only from those who have previously submitted specific written comments regarding the proposed project during scoping or other designated opportunity for public comment in accordance with § 218.5(a). Issues raised in objections must be based on previously submitted timely, specific written comments regarding the proposed project unless based on new information arising after designated opportunities.

Permits, Licenses or other Authorizations Required

The Project includes actions within aquatic or riparian areas that may be subject to future permitting requirements under Section 404 of the Clean Water Act (CWA), Section 401 of the CWA, and/or Section 1600 et seq of California Fish and Game Code.

Additionally, the Project will require consultation with the United States Fish and Wildlife Service (USFWS) on listed species. Based on current and potential future funding from the state of California, compliance with the California Environmental Quality Act will be required.

Nature of Decision To Be Made

Given the purpose and need, the Responsible Officials will determine whether the proposed actions comply with all applicable laws governing Forest Service actions and with the applicable standards and guidelines found in the Forest Plans of the Eldorado National Forest and Stanislaus National Forest; whether the EIS has sufficient environmental analysis to make an informed decision; and whether the proposed action and any action alternatives meet the purpose and needs for action. With this information, the Responsible Officials must decide whether to select the proposed action and what, if any, additional actions should be required.

Substantive Provisions

The substantive provisions of 36 CFR 219.8 through 219.11 that may directly apply to the proposed project-specific forest plan amendments are 36 CFR 219.9 Diversity of Plant and Animal Communities, (a) Ecosystem plan components, (1) Ecosystem integrity (36 CFR 219 (a)(1)); 36 CFR 219.9 Diversity of Plant and Animal Communities, (a) Ecosystem plan components, (2) Ecosystem diversity, (i) key characteristics associated with the terrestrial and aquatic ecosystem types (36 CFR 219(a)(2)(I)); 36 CFR 219.9 Diversity of Plant and Animal Communities, (a) Ecosystem plan components, (2) Ecosystem diversity, (ii) rare aquatic and terrestrial plant and animal communities (36 CFR 219 (a)(2)(ii)); and 36 CFR 219.8 Sustainability, (b) Social and Economic Sustainability, (1) Social, cultural, and economic conditions relevant to the area
