SUPPLEMENTARY INFORMATION:**I. Background**

In early June of this year, the EPA proposed to grant two one-year extensions to the Moderate attainment date for the 2006 24-hour PM_{2.5} Logan, UT-ID nonattainment area. *See* 82 FR 25992 (June 6, 2017); 82 FR 26638 (June 8, 2017). Under CAA section 188(d), the EPA may grant a state’s request to extend the attainment date for a Moderate area if: “(1) the state has complied with all requirements and commitments pertaining to the area in the applicable implementation plan; and (2) no more than one exceedance of the 24-hour [National Ambient Air Quality Standard (NAAQS)] level for PM₁₀ has occurred in the area in the year preceding the Extension Year, and the annual mean concentration for PM₁₀ in the area for such year is less than or equal to the standard level.” The statute provides the EPA with authority to issue only two one-year extensions for a single Moderate area.

On August 24, 2016, the EPA finalized the Fine Particulate Matter National Ambient Air Quality Standards: State Implementation Plan Requirements (“PM_{2.5} Implementation Rule”), 81 FR 58010, and that rule includes requirements applicable to Moderate area extension requests under CAA section 188(d). Under the regulations, the EPA may grant an
