Abstract:

The Disability Rights Section (DRS), Civil Rights Division, Department of Justice is seeking to extend its information collection arising from a regulatory provision that requires covered movie theaters to disclose information to the public regarding the availability of closed movie captioning and audio description for movies exhibited in a digital format (digital movies) shown in their auditoriums.

Title III of the Americans with Disabilities Act (ADA), at 42 U.S.C. 12182, prohibits public accommodations from discriminating against individuals with disabilities. The existing ADA title III regulation, at 28 CFR 36.303(a)–(g), requires covered entities to ensure effective communication with individuals with disabilities. The title III regulation clarifies that movie theaters that provide captioning or audio description for digital movies must ensure “that all notices of movie showings and times at the box office and other ticketing locations, on websites and mobile apps, in newspapers, and over the telephone, inform potential patrons of the movies or showings that are available with captioning and audio description.” 28 CFR 36.303(g)(8). This requirement does not apply to any third-party providers of films, unless they are part of or subject to the control of the public accommodation. *Id.* Movie theaters’ disclosure of this information will enable individuals with hearing and vision disabilities to readily find out where and when they can have access to digital movies with these features.

Overview of This Information Collection

1. *Type of Information Collection:* Revision of Currently Approved Collection.

2. *The Title of the Form/Collection:* Requirement that Movie Theaters Provide Notice as to the Availability of Closed Movie Captioning and Audio Description for Digital Movies.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* *Sponsor:* The applicable component

within the Department of Justice is the Civil Rights Division.

4. *Affected public who will be asked or required to respond, as well as the obligation to respond:* Affected Public (Primary) Private Sector-for or not for profit institutions, Federal Government. Specifically, businesses and not-for-profit institutions that own, operate, or lease a movie theater that has one or more auditoriums showing digital movies with closed movie captioning and audio description, and that provide notice of digital movie showings and times. Under the relevant regulation, “movie theater” means a facility other than a drive-in theater that is used primarily for the purpose of showing movies to the public for a fee.

Legal Obligation to Respond: Mandatory.

This information collection is required to comply with statutory and regulatory obligations under title III. Under 42 U.S.C. 12182(b)(2)(A)(iii), public accommodations must take steps to ensure that individuals with disabilities are not denied services because of the absence of auxiliary aids and services, unless doing so would result in an undue burden or fundamental alteration. Pursuant to 42 U.S.C. 12186(b), the Attorney General is authorized to issue regulations to carry out title III. The Department’s implementing regulation at 28 CFR 36.303(g)(8) requires covered movie theaters to provide information to the public about the availability of closed movie captioning and audio description for digital movies. This public disclosure obligation is the basis for this Information Collection Request (ICR).

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:*

The Department’s initial PRA request for this collection relied on U.S. Census Bureau data from 2012 and estimated that there was a total of 1,876 firms owning one or more movie theaters in the United States that were potentially subject to this disclosure. See 81 FR 37643 (June 10, 2016). The most recent U.S. Census Bureau data, from 2022, estimated that there was a total of 1,813 firms owning one or more movie theaters. See U.S. Census Bureau, 2022 SUBS Annual Data Tables by Establishment Industry, Data by Enterprise Employment Size, U.S., 6-digit NAICS (512131). As the vast majority of U.S. movie theaters now show digital movies, which typically allow for closed captioning and audio description, to the extent that each of these movie theater firms that shows digital movies provides notices of movie

showings and times to the public about those films, they must provide information concerning the availability of closed movie captioning and audio description in their communications.

An estimate of the total annual burden (in hours) associated with the collection: 8.7 hours per year.

The Department acknowledges that the amount of time it will take a respondent to comply with this requirement may vary depending on the number of digital movies that the respondent is showing at any given time. Based on information gathered during the initial rulemaking process, the Department estimates that respondents will take an average of up to 10 minutes each week to update existing notices of digital movie showings and times with closed captioning and audio description information. Therefore, the Department estimates that each firm owning one or more theaters offering digital movies with closed captioning or audio description will spend approximately $((10 \text{ minutes/week} \times 52 \text{ weeks/year}) \div 60 \text{ minutes/hour})$ 8.7 hours each year to comply with this requirement.

The Department anticipates that firms owning one or more movie theaters will likely update their existing listings of digital movie showings and times to include information concerning the availability of closed movie captioning and audio description on a regular basis. The Department’s research suggests that this information would only need to be updated whenever a new digital movie with these features is added to the schedule. This will vary as some digital movies stay on the schedule for longer periods of time than others, but the Department estimates that respondent firms will update their listings to include this information weekly. In the future, if all movies are distributed with these accessibility features, specific notice on a movie-by-movie basis may no longer be necessary and firms owning movie theaters may only need to advise the public that they provide closed captioning and audio description for all of their digital movies.

An estimate of the total annual cost burden associated with the collection, if applicable:

The estimated public burden associated with this collection is 15,713 hours. The Department estimates that respondents will take an average of 10 minutes each week to update their existing listings of digital movie showings and times with the required information about closed captions and audio description. If each respondent spends 10 minutes each week to update its notices of digital moving showings

and times to include this information, the average movie theater firm will spend 8.7 hours annually ((10 minutes/week × 52 weeks/year) ÷ 60 minutes/hour) complying with this requirement.

The Department expects that the annual public burden hours for

disclosing this information will total (1,813 respondents × 8.7 hours/year) 15,713 hours.

Yearly costs to industry are estimated to be \$0, as updates to communications and advertisements listing digital movie showings and times are normal tasks

performed by movie theater personnel and any additional work related to this public disclosure requirement is minimal (e.g., adding symbols to indicate the availability of closed movie captioning and audio description next to a digital movie title).

TOTAL BURDEN HOURS

Activity	Number of respondents	Frequency (annually)	Total annual responses	Time per response (min)	Total annual burden (hours)
Weekly update of movie listings with closed captioning/audio description available	1,813	52	94,276	10	15,713
Totals	1,813	52	94,276	10	15,713
