

These orders resulted in part from increasing congestion and delays at the airports requiring the FAA to allocate arrival and departure slots at JFK, EWR, and LGA. The designations resulted in part from increasing congestion and delays at the airports requiring FAA to implement a voluntary process to manage operational growth at ORD and SFO.

The information is reported to the FAA by carriers holding a slot at JFK, EWR, or LGA; by carriers operating at ORD or SFO; or by operators conducting unscheduled operations at LGA. At JFK and EWR, carriers must notify the FAA of: (1) Requests for confirmation of transferred slots; (2) requests for seasonal allocation of historic and additional available slots; and (3) usage of slots on a seasonal basis. At LGA, carriers must notify the FAA of: (1) Requests for confirmation of transferred slots; (2) slots required to be returned or slots voluntarily returned; (3) requests to be included in a lottery for available slots; and (4) usage of slots on a bi-monthly basis. At LGA, unscheduled operators must request and obtain a reservation from the FAA prior to conducting an operation. At ORD and SFO, carriers must notify the FAA of their intended operating schedules on a seasonal basis. The FAA estimates that all information from carriers is submitted electronically from information stored in carrier scheduling databases, and that nearly all requests for unscheduled operation reservations are submitted electronically through either an Internet or touch-tone system interface.

Respondents: Approximately 500 carriers and other operators.

Frequency: Information is collected as needed; some reporting on bimonthly or semiannual basis.

Estimated Average Burden per Response: 2 minutes per unscheduled operation reservation; 6 minutes per notice of slot transfer; 2 hours per schedule submission or slot request; and 2 hours per slot usage report.

Estimated Total Annual Burden: 7,031.5 hours.
