

consultation under section 7 of the ESA is not required for this action.

National Environmental Policy Act (NEPA)

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216–6A, NMFS must review our action (*i.e.*, the issuance of an IHA) with respect to potential impacts on the human environment.

This action is consistent with categories of activities identified in Categorical Exclusion B4 (IHAs with no anticipated serious injury or mortality) of the Companion Manual for NOAA Administrative Order 216–6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that will preclude this categorical exclusion. Accordingly, NMFS has determined that the issuance of the IHA qualifies to be categorically excluded from further NEPA review.

Authorization

NMFS has issued an IHA to the Navy for the potential harassment of small numbers of six marine mammal species incidental to the pile removal activities at Naval Base Point Loma in San Diego Bay, California from January 15, 2022 through January 14, 2023, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated.

Dated: August 27, 2021.

Catherine Marzin,

*Acting Director, Office of Protected Resources,
National Marine Fisheries Service.*

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Scientific Research, Exempted Fishing, and Exempted Activity Submissions

AGENCY: National Oceanic & Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of Information Collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995, invites the general public and other Federal agencies to comment on proposed and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to the Office of Management and Budget.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before November 1, 2021.

ADDRESSES: Interested persons are invited to submit written comments to Adrienne Thomas, NOAA PRA Officer, at Adrienne.thomas@noaa.gov. Please reference Office of Management and Budget (OMB) Control Number 0648–0309 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Karen Abrams, Supervisory Fishery Management Specialist, NOAA Fisheries, 1315 East West Highway Silver Spring MD 20910, 301–427–8508, and Karen.abrams@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for an extension of a currently approved information collection. Under section 318 (d) of the Magnuson-Stevens Fishery and Conservation and Management Act (Magnuson-Stevens Act) [16 U.S.C. 1801 *et seq.*], as amended by the Sustainable Fisheries Act [Pub. L. 104–297], the Secretary of Commerce (Secretary) is required to promulgate regulations that create an expedited, uniform, and regionally-based process to promote issuance, where practicable, of experimental fishing permits. Regulations under 50 CFR 648.12 and 50 CFR 600.745 establish processes for scientific research plans as well as exempted fishing and exempted educational activities that are exempted from applicable fishing regulations.

Fishing regulations do not generally affect scientific research activities conducted by a scientific research vessel. Persons planning to conduct such research are encouraged to submit a scientific research plan to ensure that the activities are considered research and not fishing. NMFS reviews each

scientific research plan submitted to establish that the sponsoring organization and personnel involved are recognized scientific investigators, that the specific project contemplated appears to be scientific research and not fishing, and that the vessel or vessels to be used are or will be used exclusively for research for the duration of the scientific research cruise. The researchers are also requested to submit reports of their scientific research activity after its completion. NMFS Regions, Fishery Science Centers, and NMFS and Coast Guard enforcement personnel use information obtained from voluntarily submitted research plans and subsequent reports in monitoring such activities to ensure they are bona fide scientific research activities.

The National Marine Fisheries Service (NMFS) may also grant exemptions from fishery regulations for educational or other activities (*e.g.*, using non-regulation gear). Exempted fishing, by definition, is fishing outside of the standard regulations. To control this fishing and determine the extent of this fishing, NMFS needs information to determine the justification of granting an exempted fishing permit (EFP) or exempted educational activity authorization (EEAA), and documentation of catches landed as a result of granting the permit/authorization. A NMFS Regional Administrator or Director may authorize, for limited testing, public display, data collection, exploratory fishing, compensation fishing, conservation engineering, health and safety surveys, environmental cleanup, and/or hazard removal purposes, the target or incidental harvest of species managed under a Fishery Management Plan (FMP) or fishery regulations that would otherwise be prohibited. The applications for these exemptions must be submitted, as well as reports on activities. NMFS Regions, Regional Fishery Management Councils, Fishery Science Centers, and NMFS and USCG enforcement personnel use the EFP application statement of purpose and goals in evaluating proposals to determine their usefulness to the overall goals of the applicable fishery management plan and for issuance of permits, and evaluate them comparatively with other applicants for the same fishery. NMFS evaluates EEAA applications to confirm their educational value and determine their usefulness to the overall goals of the applicable fishery management plan and for issuance of permits. NMFS Regions, Centers, and enforcement personnel use

exempted fishing and exempted educational activity reports to ensure activities are carried out as described in the permit, document the catch for inclusion in the total catch, and consider the permittee for future permits.

Eligible researchers on board federally permitted fishing vessels that plan to temporarily possess fish in a manner not compliant with applicable fishing regulations for the purpose of collecting scientific data on catch may submit a request for a temporary possession letter of authorization. The researchers are requested to submit reports of their scientific research activity after its completion.

II. Method of Collection

Responses are typically received electronically. However, information may also be submitted on paper or by telephone.

III. Data

OMB Control Number: 0648–0309.
Form Number(s): None.

Type of Review: Regular submission (extension of a current information collection).

Affected Public: Business or other for-profit; individuals or households; not for profit organizations; state, local or tribal governments.

Estimated Number of Respondents: 121.

Estimated Time per Response: Scientific research plans, 13 hours; scientific research reports, 6 hours; exempted fishing permit requests, 10 hours; exempted fishing permit reports, 4.5 hours; exempted educational requests, 5 hours; exempted educational reports, 2.5 hours.

Estimated Total Annual Burden Hours: 2,141.

Estimated Total Annual Cost to Public: \$0.

Respondent's Obligation: Mix of Voluntary, Required to Obtain or Retain Benefits, or Mandatory.

Legal Authority: The Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*).

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c)

Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this information collection request. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

Taking and Importing Marine Mammals; Taking Marine Mammals Incidental to Geophysical Surveys Related to Oil and Gas Activities in the Gulf of Mexico

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of issuance of Letter of Authorization.

SUMMARY: In accordance with the Marine Mammal Protection Act (MMPA), as amended, its implementing regulations, and NMFS' MMPA Regulations for Taking Marine Mammals Incidental to Geophysical Surveys Related to Oil and Gas Activities in the Gulf of Mexico, notification is hereby given that a Letter of Authorization (LOA) has been issued to Fugro USA Marine, Inc. (Fugro) for the take of marine mammals incidental to geophysical survey activity in the Gulf of Mexico.

DATES: The LOA is effective from December 1, 2021, through November 30, 2022.

ADDRESSES: The LOA, LOA request, and supporting documentation are available online at: www.fisheries.noaa.gov/action/incidental-take-authorization-oil-and-gas-industry-geophysical-survey-activity-gulf-mexico. In case of problems accessing these documents, please call the contact listed below (see **FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Kim Corcoran, Office of Protected Resources, NMFS, (301) 427–8401.

SUPPLEMENTARY INFORMATION:

Background

Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

An authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth. NMFS has defined “negligible impact” in 50 CFR 216.103 as an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.

Except with respect to certain activities not pertinent here, the MMPA defines “harassment” as: any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment).

On January 19, 2021, we issued a final rule with regulations to govern the unintentional taking of marine mammals incidental to geophysical survey activities conducted by oil and gas industry operators, and those persons authorized to conduct activities
