Background

The Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*) requires that NMFS develop and implement recovery plans for the conservation and survival of threatened and endangered species under its jurisdiction unless it is determined that such plans will not promote the conservation of the species. In 1991, NMFS issued the first recovery plan for northern right whales. NMFS, in consultation with key constituent groups and organizations, has prepared an updated draft plan for right whales in the North Atlantic ocean. The plan discusses the natural history, current status, and the known and potential human impacts to right whales. Actions needed to promote the recovery of this species are identified and discussed. A Final Recovery Plan will be used to direct U.S. activities, and to encourage international cooperation to promote the recovery of these endangered species.

New England Fishery Management Council; Notice and Request for Sea Scallop Research Proposals; Correction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of solicitation for applications; correction.

SUMMARY: On May 29, 2001, NMFS published a notice in the **Federal Register** that provided information on the research total allowable catch (TAC) set-aside program authorized under Framework 14 to the Atlantic Sea Scallop Fishery Management Plan. The notice provided information on the submission process, eligibility criteria, proposal requirements and priorities, project evaluation, application deadlines and other requirements related to the TAC set-aside research program. One of the project funding priorities was inadvertently omitted. In addition, the document contains

numerous typographical errors. This document corrects these errors.

DATES: May 29, 2001.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: On May 11, 2001 (66 FR 24052), NMFS published a final rule implementing Framework 14 to the Atlantic Sea Scallop Fishery Management Plan. This framework implemented a system for allowing controlled scallop fishing in the Hudson Canyon and Virginia Beach Sea Scallop Access Areas. Framework 14 also implemented a TAC set-aside program to support sea scallop research projects. Under the program, certain limited access sea scallop vessels would be allowed to land scallops in excess of the possession limit, or take additional trips above those provided for in the program, and use the proceeds of the excess catch or additional trips to offset the costs of the research proposals submitted in response to the May 29 **Federal Register** notice.

The notice published on May 29, 2001 (66 FR 29090), contains errors. A number of words and phrases were combined (run together) without the appropriate spacing between the words.
