**TV-13a Oaks/Avery Canal Hydrologic Restoration Project Notice of Finding of No Significant Impact**

The project will minimize marsh loss which is attributed to saltwater intrusion, shoreline deterioration, and bankline erosion within the project area. This will be accomplished by the installation of 800 linear feet of bankline stabilization on Oaks Canal, 6,500 linear feet of bankline stabilization along the Gulf Intracoastal Waterway (GIWW), one (1) low sill weir structure at the "cowpath" and approximately 900 linear feet of bankline stabilization in a manmade channel east of Oaks Canal

and north of GIWW, one (1) armored plug in a breach in the north bank of the Union Oil Canal, and 1,100 linear feet of spoilbank refurbishment on the Union Oil Canal.

The Notice of Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various federal, state, and local agencies and interested parties.
