

officials apprised of proposed health services grant and cooperative agreement applications submitted by community-based nongovernmental organizations within their jurisdictions.

Community-based nongovernmental service providers who are not transmitting their applications through the State must submit a PHSIS to the head(s) of the appropriate State and local health agencies in the area(s) to be affected not later than the pertinent receipt date for applications. This PHSIS consists of the following information:

- a. A copy of the face page of the application (Standard form 424).
- b. A summary of the project (PHSIS), not to exceed one page, which provides:
 - (1) A description of the population to be served.
 - (2) A summary of the services to be provided.
 - (3) A description of the coordination planned with the appropriate State or local health agencies.

State and local governments and Indian Tribal Authority applicants are not subject to the Public Health System Reporting Requirements. Application guidance materials will specify if a particular FY 2002 activity is subject to the Public Health System Reporting Requirements.

PHS Non-use of Tobacco Policy Statement: The PHS strongly encourages all grant and contract recipients to provide a smoke-free workplace and promote the non-use of all tobacco products. In addition, Public Law 103-227, the Pro-Children Act of 1994, prohibits smoking in certain facilities (or in some cases, any portion of a facility) in which regular or routine education, library, day care, health care, or early childhood development services are provided to children. This is consistent with the PHS mission to protect and advance the physical and mental health of the American people.

Executive Order 12372: Applications submitted in response to the FY 2002 activity listed above are subject to the intergovernmental review requirements of Executive Order 12372, as implemented through DHHS regulations at 45 CFR part 100. E.O. 12372 sets up a system for State and local government review of applications for Federal financial assistance. Applicants (other than Federally recognized Indian tribal governments) should contact the State's Single Point of Contact (SPOC) as early as possible to alert them to the prospective application(s) and to receive any necessary instructions on the State's review process. For proposed projects serving more than one State, the applicant is advised to contact the SPOC

of each affected State. A current listing of SPOCs is included in the application guidance materials. The SPOC should send any State review process recommendations directly to: Division of Extramural Activities, Policy, and Review, Substance Abuse and Mental Health Services Administration, Parklawn Building, Room 17-89, 5600 Fishers Lane, Rockville, Maryland 20857.

The due date for State review process recommendations is no later than 60 days after the specified deadline date for the receipt of applications. SAMHSA does not guarantee to accommodate or explain SPOC comments that are received after the 60-day cut-off.

Dated: April 18, 2002.

Richard Kopanda,

Executive Officer, Substance Abuse and Mental Health Services Administration.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Availability, Draft Restoration Plan and Environmental Assessment

AGENCY: Fish and Wildlife Service, Department of the Interior.

ACTION: Notice of Availability.

SUMMARY: The U.S. Fish and Wildlife Service (Service), on behalf of the Department of the Interior and the State of Rhode Island, announces the release for public review of the draft Restoration Plan and Environmental Assessment (RP/EA) for the Landfill and Resource Recovery, Inc Superfund Site. The RP/EA describes the trustees' proposal to restore natural resources injured as a result of the release of hazardous substances from the site.

DATES: Written comments must be submitted on or before May 30, 2002.

ADDRESSES: Requests for copies of the RP/EA may be made to the U.S. Fish and Wildlife Service, New England Field Office, 70 Commercial Street, Suite 300, Concord, New Hampshire 03301.

Written comments or materials regarding the RP/EA should be sent to the same address.

FOR FURTHER INFORMATION CONTACT:

Molly B. Sperduto or Kenneth C. Carr, Environmental Contaminants Program, U.S. Fish and Wildlife Service, 70 Commercial Street, Suite 300, Concord, New Hampshire 03301.

Interested parties may also call 603-223-2541 for further information.

SUPPLEMENTARY INFORMATION: The Landfill and Resource Recovery, Inc. Superfund Site, located in North Smithfield, Rhode Island was an active landfill until 1986, when the landfill was closed and approximately three-fourths of the site was covered with a synthetic cap. Due to erosion and regrading associated with capping the landfill, approximately 1 acre of palustrine emergent and scrub-shrub wetland habitat was destroyed in perpetuity.

In 1997, the United States of America and the State of Rhode Island settled claims for natural resource damages associated with the Landfill and Resource Recovery, Inc. Superfund Site under the authority of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980. The settlement proceeds will be used to compensate for loss of natural resources under trusteeship of the Department of the Interior and the State of Rhode Island. The RP/EA is being released in accordance with CERCLA of 1980 as amended, commonly known as Superfund, (42 U.S.C. 9601 et seq.), the Natural Resource Damage Assessment Regulations found at 43 CFR, part 11, and the National Environmental Policy Act. It is intended to describe the trustees' proposals to restore natural resources injured at the site and evaluate the impacts of each.

The RP/EA describes a number of habitat restoration and protection alternatives and discusses the environmental consequences of each. Restoration efforts which have the greatest potential to restore wetlands and the services those wetlands provide to wetland-dependant wildlife are preferred. Based on an evaluation of the various restoration alternatives, the restoration of wetland habitat at the former Lonsdale Drive-In is proposed. This alternative maximizes the benefit to wetland-dependent wildlife, restoring over 20 acres of riparian habitat, including 7 acres of wetland.

Interested members of the public are invited to review and comment on the RP/EA. Copies of the RP/EA are available for review at the U.S. Fish and Wildlife Service's New England Field Office in Concord, New Hampshire (70 Commercial Street, Suite 300, Concord, New Hampshire). Additionally, the RP/EA will be available for review at the North Smithfield Municipal Annex Building. Written comments will be considered and addressed in the final RP/EA at the conclusion of the restoration planning process.
