

Act of 1997, Executive Order 12996, and Service policies and procedures for compliance with those regulations.

Background

Cabeza Prieta National Wildlife Refuge was established in 1939 by Executive Order to protect wildlife and forage resources of the Sonoran Desert. In 1990 approximately 93 percent of the Refuge land area was designated Federal Wilderness by the Arizona Desert Wilderness Act of 1990.

The Refuge occupies approximately 860,010 acres of Sonoran Desert, including mountains, broad desert, and bajadas. The Refuge and adjacent Federal lands; including the Organ Pipe National Monument, managed by the U.S. National Park Service, and the USAF Barry M. Goldwater Range military training area; comprise the United States' range of the Endangered Sonoran pronghorn. The desert bighorn sheep is another species of conservation interest occurring on the Refuge.

The draft CCP and EIS propose and evaluate five management alternatives for the Refuge. All management alternatives implement recovery actions for the Endangered Sonoran pronghorn. The alternatives differ primarily in the level of active management intervention proposed to support the desert bighorn sheep. The first alternative is "no action" or continuance of current Refuge management. Under this alternative, the Refuge would continue to offer a limited desert bighorn sheep hunt each year in cooperation with the Arizona Game and Fish Department. Refuge staff would continue to maintain and supply supplemental water to existing developed waters in desert bighorn sheep habitat. The second alternative focuses on limiting management interventions within Refuge wilderness. Under this alternative, developed wildlife waters in sheep habitat within the Refuge wilderness would not be maintained or supplied with supplemental water. The desert bighorn sheep hunt would also be discontinued. The third alternative includes limited management intervention in wilderness. Under this alternative, the Refuge would supply supplemental water to developed waters in sheep habitat within Refuge wilderness only during periods of severe drought. The desert bighorn sheep would be continued, but no hunting would be allowed during years of severe drought. The fourth alternative, identified as the Service's proposed alternative, would allow continued maintenance and water supply to existing developed waters in sheep habitat within Refuge wilderness

and would include projects to increase the water collection efficiency of such waters. The Refuge desert bighorn sheep hunt program would continue unchanged under this alternative. The fifth alternative would include the maximum management intervention within Refuge wilderness. Under this alternative all existing developed waters in Refuge wilderness would be maintained and supplied with water, and new developed waters would be created. The desert bighorn sheep hunt program would continue unchanged under this alternative.

Public Meetings

The Service will hold public meetings to present the draft CCP, answer questions, and receive formal public comments in Yuma, Tucson, Sells, and Ajo, Arizona, during the public comment period. The exact location, time, and date of these meetings will be determined based on logistic issues. Notice of the meetings will be posted in local newspapers and other media outlets and given through mailings to individuals and organizations that have expressed interest in this planning effort.
