

(ranging from fully in-person to fully remote), the hours of instruction for students, and how enrollment and attendance rates vary by a number of social stratifying factors including race/ethnicity, socio-economic status, English learner status, and disability status. The work proposed in this package, the NAEP 2021 School and Teacher Questionnaire Special Study, is a more in-depth data collection. Although it will collect data only once, it allows NCES a deeper and richer understanding of how schools and teachers are faring while operating during a pandemic. Because the instruments are very much the same as the instruments used during every administration of NAEP, the data collected will also allow us to better understand trends in schools across and through the global coronavirus pandemic. In addition, a summative report will be provided at the end of the collection, relating the results to those from the NAEP 2021 School Survey.

SUPPLEMENTARY INFORMATION:

Title: FERC-512, Preliminary Permit. OMB Control No.: 1902-0073.

Type of Request: Three-year approval of the FERC-512 information collection requirements, with no changes to the current reporting requirements in Docket No. IC21-8-000.

Abstract: The Commission regulates nonfederal hydropower projects on navigable waters and federal lands pursuant to the Federal Power Act (FPA).¹ The FERC-512 is an application for a preliminary permit or to extend a

preliminary permit term. Preliminary permits, issued for up to four years, preserve the right of permit holders to have first priority in applying for a license for a project being studied, but do not authorize construction of any facilities. Nor does a preliminary permit allow the use of eminent domain to acquire lands for the project. The preliminary permits are issued pursuant to sections 4(f), 5, and 7 of the FPA. Preliminary permits may be extended one time for up to four additional years, pursuant to section 5 of the FPA. The purpose of obtaining a preliminary permit is to maintain priority status for an application for a license while the applicant conducts site examinations and surveys to prepare maps, plans, specifications, and estimates. This period of time also provides the applicant with the opportunity to conduct engineering, economic, and environmental feasibility studies in addition to making the financial arrangements for funding the construction of the project. No other application for a preliminary permit or application for license submitted by another party can be accepted during the permit term. The application for a preliminary permit is used by Commission staff to assess the scope of the proposed project, the technology to

be used, and jurisdictional aspects of the project. The staff assessment includes a review of the proposed hydro development for conflicts with other permits or existing projects and public notice of the application to solicit public and agency comments. The application for a one-time extension, up to four years, of a preliminary permit is used by Commission staff to determine if a permittee has met the 2018 Water Infrastructure Act's good faith and reasonable diligence standard. An application for a preliminary permit includes an initial statement and three numbered exhibits, per 18 CFR 4.81. The initial statement includes information on the applicant, the project, the requested term of the permit, affected political jurisdictions, and a verification of the facts.

Type of Respondents: Business or other for-profit and not for-profit institutions.

In response to the Notice of Information Collection Request for comments published in the **Federal Register** on January 11, 2021 (86 FR 1957), the Commission received no comments on the 60-day Paperwork Reduction Act notice.

Estimate of Annual Burden² and Cost³: The Commission estimates as shown below in the table:

FERC-512: (PRELIMINARY PERMIT)

	Number of respondents	Annual number of responses per respondent	Total number of responses	Average burden hours & cost per response	Total annual burden hours & total annual cost	Average annual cost per respondent
	(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1)
Annual Reporting and Recordkeeping.	50	1	50	24 hrs.; \$1,992	1,200 hrs.; \$99,600	\$1,992
Total FERC-512 ...	50	1	50	24 hrs.; \$1,992	1,200 hrs.; \$99,600	1,992

Comments: Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those

who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: March 18, 2021.

Secretary.
