Needs and Uses: On March 24, 2017, the Federal Communications Commission released a Report and Order, Promoting Technological Solutions to Combat Contraband Wireless Devices in Correctional Facilities, GN Docket No. 13–111, FCC 17–25 (Report and Order), in which the Commission took important steps to help law enforcement combat the serious threats posed by the illegal use of contraband wireless devices by inmates. Across the country, inmates have used contraband devices to order hits, run drug operations, operate phone scams, and otherwise engage in criminal activity that endangers prison employees, other inmates, and innocent members of the public. In the Report and Order, the Commission streamlined the process of deploying contraband wireless device interdiction systems—systems that use radio communications signals requiring Commission authorization—in correctional facilities. The action will reduce the cost of deploying solutions and ensure that they can be deployed more quickly and efficiently. In particular, the Commission waived certain filing requirements and provided for immediate approval of the spectrum lease applications needed to operate these systems.

The effectiveness of Contraband Interdiction System (CIS) deployment requires all carriers in the relevant area of the correctional facility to execute a spectrum lease with the CIS provider. Even if the major Commercial Mobile Radio Services (CMRS) licensees
