### Forest Service

#### Freds Fire Restoration, Eldorado National Forest, El Dorado County, CA

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of intent to prepare an environmental impact statement.

**SUMMARY:** In October 2004, the Freds Fire burned approximately 7,700 acres on the Eldorado National Forest and on private timberlands. The project area for this analysis is the approximately 4,600 acre portion of the Freds Fire on National Forest System lands. The USDA, Forest Service, Eldorado National Forest will prepare an environmental impact statement (EIS) for a proposal to treat approximately 3,200 acres of fire killed and damaged trees in the Freds Fire burned area. The land allocations within the fire area, as identified in the Sierra Nevada Forest Plan Supplemental EIS, are threat zone, defense zone, general forest, protected activity centers for spotted owls, spotted owl home range core areas, and riparian conservation areas adjacent to perennial, seasonal and ephemeral streams.

The purpose of the project is to: (1) Reduce long term fuel loading to reduce future fire severity and resistance to control; (2) improve roads and establish effective ground cover in severely burned areas to reduce erosion and sedimentation to streams in the short term, and to contribute to long term soil productivity; (3) recover the economic value of timber killed or severely injured by the fire, in an expeditious manner, for the purpose of generating funds to offset the cost of future restoration activities; and (4), reduce safety hazards to the public and forest workers.
