

reducing costs of transport in targeted rural areas and improving land services. The Government also will contribute approximately \$26,250,000 to support the Compact program.

Project Summaries

The Compact is comprised of three projects:

1. *Accelerated Growth Corridors Project*: The objective of the Accelerated Growth Corridors Project is to reduce costs of transport in targeted rural areas. The Project includes two activities:

- *Road Corridor Improvement Activity*: This activity aims to target investment in physical upgrades and improvements across different classes of roads within four selected corridors to improve rural access by addressing road conditions and reducing transport costs.

- *Policy and Institutional Reform and Capacity Building Activity*: This activity focuses on assistance to the Government to address policy, legislative, institutional, and funding issues to

ensure that road transport in Accelerated Growth Corridors is well-maintained and managed.

2. *Increased Land Productivity Project*: The objective of the Increased Land Productivity Project is to improve land services. The Project includes two activities:

- *Land Administration Resourcing and Institutions Activity*: This aims to support analysis, reform, and implementation of reforms to expand national land-based revenues, address institutional change, and address the land rights records that underpin land institution work.

- *City Council Land-Based Revenue Modernization Activity*: This activity aims to expand coverage and collection of land-based revenues, as well as to increase resources for key services and increase investment in land. MCC Funding shall support a sequence of activities in up to four cities (Lilongwe, Blantyre, Mzuzu, and Zomba).

3. *ACFD Project*: The compact program also includes allocation for the American Catalyst Facility for Development (ACFD) Project. The purpose of this funding is to facilitate U.S. International Development Finance Corporation (DFC) investments in Malawi. MCC and DFC will discuss specific transactions to be supported by the ACFD Project which shall be agreed to by the Parties in writing after proposals submitted by the DFC have undergone the ACFD screening and approvals process. Transactions supported by the ACFD Project shall be consistent with the missions of both MCC and DFC, as well as all applicable statutory requirements and authorities.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–250 and 50–251; NRC–2022–0172]

Notice of Intent To Conduct Scoping Process and Prepare Environmental Impact Statement Florida Power & Light Company Turkey Point Nuclear Generating Unit Nos. 3 and 4

AGENCY: Nuclear Regulatory Commission.

ACTION: Subsequent license renewal application supplement; intent to conduct scoping process and prepare environmental impact statement; and request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has received Environmental Report, Supplement 2, from Florida Power & Light Company (FPL, the applicant), dated June 9, 2022, related to FPL's application for subsequent license renewal (SLR) of Renewed Facility Operating License Nos. DPR–31 and DPR–41 for Turkey Point Nuclear Generating Unit Nos. 3 and 4 (Turkey Point). The NRC staff has determined that the Environmental Report, Supplement 2, is acceptable for docketing, and that the staff will prepare a supplement to its final supplemental environmental impact statement (FSEIS) for Turkey Point subsequent license renewal, i.e., NUREG–1437, Supplement 5, Second Renewal, “Generic Environmental Impact Statement for License Renewal of Nuclear Plants, Supplement 5, Second Renewal, Regarding Subsequent License Renewal for Turkey Point Nuclear Generating Unit Nos. 3 and 4, Final Report” (October 2019). The subsequent renewed operating licenses would authorize the applicant to operate Turkey Point for an additional 20 years beyond the period specified in each of the current licenses. The current operating licenses for Turkey Point Unit Nos. 3 and 4 expire on July 19, 2032, and April 10, 2033, respectively. The NRC will conduct a limited scoping process to gather information necessary to prepare a supplement to its environmental impact statement (EIS) to evaluate the environmental impacts of SLR of the operating licenses for Turkey Point. The NRC is seeking public comment on the proper scope of the EIS
