BASIC is a key element of the Natural and Accelerated Bioremediation Research (NABIR) program that provides the fundamental science underlying bioremediation of radionuclides and metals in subsurface environments at DOE sites. Research is encouraged that identifies critical societal, cultural, legal, policy, regulatory or other issues that could enhance or complicate the development and utilization of bioremediation methods or approaches. Educational activities that enhance the dialogue among scientists, regulators and community members about plausible implementation of bioremediation of radionuclides and metals are also being sought. Partnerships between social scientists and physical/biological scientists in the development of BASIC projects are strongly encouraged.
