SUPPLEMENTARY INFORMATION:

Title: Retrofit/Rebuild Requirements for 1993 and Earlier Model Year Urban Buses; OMB Control No. 2060-0302; EPA ICR No. 1702.03; expiration September 30, 2001. This is a request for extension of a currently approved collection.

Abstract: Section 219 (d) of the Clean Air Act (CAA), as amended in 1990, required that the EPA promulgate

regulations for urban buses that: (a) operate in Metropolitan Statistical Areas (MSA) or consolidated MSA's with a 1980 population of 750,000 or more (the program could be expanded in the future to MSA's of less than 750,000, under section 219(c) of the CAA); (b) are not subject to the 1994 or later urban bus standards; and (c) have their engines replaced or rebuilt after January 1, 1995. The CAA Amendments require the subject urban buses be retrofitted to comply with an emission standard that reflects the best retrofit technology and maintenance practices reasonably achievable. Under these provisions, EPA has set requirements for pre-1994 model year urban buses that are effective after January 1, 1995, when urban bus engines are rebuilt or replaced. The program requires that the particulate emissions level of the urban bus engines be reduced to a level below the engines' original particulate level through the use of retrofit/rebuild equipment that is certified by EPA. The program will phase itself out as pre-1994 are mandatory. All the information required by this collection is needed for the implementation and the activities of various EPA programs. The information is collected by the Engine Programs Group, Certification and Compliance Division, Office of Transportation and Air Quality, Office of Air and Radiation. Specific certification information submitted by manufacturers is held as confidential. Confidentiality of proprietary information is granted in accordance with the Freedom of Information Act, EPA regulations at 40 CFR part 2, and class determinations issued by EPA's Office of General Counsel.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on May 8, 2001 (66 FR 23254); no comments were received.

Burden Statement: The annual public reporting and record keeping burden for this collection of information is estimated to average 20 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes

of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Manufacturers of retrofit equipment and urban bus fleet operators.

Estimated Number of Respondents: 159.

Frequency of Response: Annually.

Estimated Total Annual Hour Burden: 3,709.

Estimated Total Annualized Capital, O&M Cost Burden: \$105,700.

The ICR, which is abstracted below, describes the nature of the information collection and its estimated cost and burden. The **Federal Register** document required

under 5 CFR 1320.8(d), soliciting comments on this collection of information, was published on April 3, 2001 (66 FR 17704). EPA received a number of comments on this ICR during the comment period, which are addressed in the ICR.

SUPPLEMENTARY INFORMATION:

Title: Partial Updating of TSCA Inventory Data Base, Production and Site Reports (EPA ICR No. 1011.05; OMB Control No. 2070-0070). This is a request for extension of an existing approved collection that is currently scheduled to expire on September 30, 2001. Under 5 CFR 1320.10(e)(2), the Agency may continue to conduct or sponsor the collection of information while the submission is pending at OMB.

Abstract: Section 8(b) of TSCA requires EPA to compile and keep current a complete list of chemical substances manufactured or processed in the United States. EPA uses the Inventory of Chemical Substances in Commerce to comply with TSCA section 8(b). This inventory, commonly referred to as the TSCA Inventory, is a listing of chemical substances manufactured, imported and processed for commercial purposes in the United States. EPA updates this inventory of chemicals every four years by requiring manufacturers, processors and importers to provide production volume, plant site information and site-limited status information on about 8,900 of the more than 75,000 chemicals on the TSCA Inventory. This information allows EPA to identify what chemicals are or are not currently in

commerce and to take appropriate regulatory action as necessary. EPA also uses the information for screening chemicals for risks to human health or the environment, for priority-setting efforts, and for exposure estimates.

Responses to the collection of information are mandatory. The TSCA Inventory Update Rule requires the submission of information on mostly organic chemicals produced or imported in volumes greater than 10,000 pounds per year (see 40 CFR part 710). Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

Burden Statement: The total public reporting burden for this collection of information is estimated to average about 22 hours per response. Burden means the total time, effort or financial resources expended by persons to generate, maintain, retain or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15.

The ICR provides a detailed explanation of the information collection activity and the corresponding burden estimate, which is only briefly summarized here.

Respondents/Affected Entities: Manufacturers, processors or importers of chemical substances, mixtures or categories.

Frequency of Collection: Once every four years.

Estimated No. of Respondents: 3,000.

Estimated Total Burden on

Respondents: 65,640 hours.

Estimated Total Annual Costs: \$1,140,000.

Changes in Burden Estimates: The total burden associated with this ICR

has increased from 34,500 hours in the previous ICR to 65,640 hours for this ICR. This adjustment in burden reflects a reassessment of the burden associated with complying with this regulation.

According to the procedures prescribed in 5 CFR 1320.12, EPA has submitted this ICR to OMB for review and approval. Any comments related to the renewal of this ICR should be submitted within 30 days of this notice, as described above.

Dated: September 13, 2001.

Director, Collection Strategies Division.
