SUPPLEMENTARY INFORMATION:

Title: Congestion Mitigation and Air Quality (CMAQ) Improvement Program. *OMB Control:* 2125-0614.

Background: The development and maintenance of a cumulative database of all CMAQ projects is required by 23 U.S.C. 149(i)(1). This database must include specific information about each project such as name, location, sponsor, cost, and to the extent already measured by the project sponsor, cost-effectiveness based on reductions in emissions and congestion. States provide annual reports on all CMAQ obligations and de-obligations taking place in each fiscal year. These reports include obligations of program funds; descriptions of individual projects; and potential impacts on air quality and congestion. The data provided in the annual reports and the CMAQ Public Access System allows for transparency, showing that the program continues to provide incremental benefits through enhanced regional and local air quality improvement, and through contributions to congestion relief.

Information provided in the CMAQ project reporting system is useful for FHWA and FTA planning purposes, as well as reports to the U.S. Congress. The database is also the official data source for reporting on CMAQ emission measure performance under the transportation performance management requirements in 23 CFR part 490.

Respondents: There are 51 respondents, including 50 State Transportation Departments and the District of Columbia.

Frequency: Once every calendar year to record CMAQ project data from the previous fiscal, on or about March 1st.

Estimated Average Burden per Response: There is a total of 51 annual reports per year on a variable number of reported projects. Each project entry requires on average 15 to 20 minutes to complete.

Estimated Total Annual Burden Hours: Total estimated average annual burden is 674 hours. (Based on the most recent ten year average of Annual Reporting projects.)
