BILLING CODE 9111-97-P

DEPARTMENT OF THE INTERIOR**Fish and Wildlife Service**

[FWS-R4-ES-2011-N031; 40120-1112-0000-F2]

Endangered and Threatened Wildlife and Plants; Receipt of Applications for Incidental Take Permits; Availability of Proposed Low-Effect Habitat Conservation Plan and Associated Documents; Indian River County, FL

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comment/information.

SUMMARY: We, the Fish and Wildlife Service (Service), announce the availability of incidental take permit (ITP) applications and a Habitat Conservation Plan (HCP). Johns Island Club, Incorporated, and the Church of God by Faith (applicants) request ITPs under the Endangered Species Act of 1973, as amended (Act). The applicants anticipate taking about 1.75 acres of Florida scrub-jay (*Aphelocoma coerulescens*) (scrub-jay) breeding, feeding, and sheltering habitat incidental to land preparation for the extension and paving of a road, the construction of a fellowship hall and storm water retention area, and the expansion and paving of a parking lot located in Indian River County, Florida (project). The permanent alteration of 1.75 acres is expected to result in the take of two families of scrub-jays. The applicants' HCP describes the minimization and mitigation measures proposed to address the effects of the project on the scrub-jay.

DATES: Written comments on the ITP applications and HCP should be sent to the South Florida Ecological Services Office (see **ADDRESSES**) and should be received on or before April 7, 2011.

Applicants' Proposed Project: We received applications from the applicants for incidental take permits, along with a proposed habitat conservation plan. The applicants both request 5-year permits under section 10(a)(1)(B) of the Act (87 Stat. 884; 16 U.S.C. 1531 *et seq.*). If we approve the permits, the applicants anticipate taking a total of approximately 1.75 acres (0.71 hectares (ha)) of scrub-jay breeding, feeding, and sheltering habitat

incidental to land preparation for the extension and paving of a road, the construction of a fellowship hall and storm water retention area, and the expansion and paving of a parking lot and supporting infrastructure (project) in Indian River County, Florida.

Project construction would take place at latitude 27.7508, longitude -80.4451, Indian River County, Florida. The project includes Indian River County Parcels 31392800007000000001.0, 31392800007000000002.0, 31392800007000000003.0, and 313928000005000000023.0. These parcels are within scrub-jay-occupied habitat. The Service listed this species as threatened in 1987 (June 3, 1987; 52 FR 20715). The listing became effective July 6, 1987.

The applicants propose to mitigate the permanent alteration of occupied scrub-jay habitat by restoring, conserving, and managing a total of 3.81 acres (1.54 ha) of upland scrub in perpetuity. A separate endowment fund, in the amount of \$4,572.00, will be established to ensure that the mitigation areas are properly managed in perpetuity.

Our Preliminary Determination: The Service has made a preliminary determination that the applicants' project, including the proposed minimization and mitigation measures, will individually and cumulatively have a minor or negligible effect on the species covered in the HCP. Therefore, issuance of the ITPs is a "low-effect" action and qualifies as a categorical exclusion under the National Environmental Policy Act (NEPA) (40 CFR 1506.6), as provided by the Department of the Interior Manual (516 DM 2 Appendix 1 and 516 DM 6 Appendix 1), and as defined in our Habitat Conservation Planning Handbook (November 1996). We base our determination that issuance of the ITPs qualifies as a low-effect action on the following three criteria: (1) Implementation of the project would result in minor or negligible effects on Federally listed, proposed, and candidate species and their habitats; (2) Implementation of the project would result in minor or negligible effects on other environmental values or resources; and (3) Impacts of the project, considered together with the impacts of other past, present, and reasonably foreseeable similarly situated projects, would not result, over time, in cumulative effects to environmental values or resources that would be considered significant. As more fully explained in our environmental action statement and associated Low Effect Screening Form, the applicants' proposed project qualifies as a "low-

effect" project. This preliminary determination may be revised based on our review of public comments that we receive in response to this notice.

Next Steps: The Service will evaluate the HCP and comments submitted thereon to determine whether the applications meet the requirements of section 10(a) of the Act. The Service will also evaluate whether issuance of the section 10(a)(1)(B) ITPs complies with section 7 of the Act by conducting an intra-Service section 7 consultation. The results of this consultation, in combination with the above findings, will be used in the final analysis to determine whether or not to issue the ITPs. If it is determined that the requirements of the Act are met, the ITPs will be issued for the incidental take of the Florida scrub-jay.

Authority: This notice is provided pursuant to Section 10 of the Endangered Species Act and NEPA regulations (40 CFR 1506.6).

Dated: February 11, 2011.

Paul Souza,

Field Supervisor, South Florida Ecological Services Office.
