Needs and Uses: On February 14, 2001, the Commission adopted a Report and Order in MM Docket No. 93-177 in the matter of An Inquiry Into the Commission's Policies and Rules Regarding AM Radio Service Directional Antenna Performance Verification. This Report and Order relaxed the technical requirements for AM stations using directional antennas. Among other things, this Report and Order eliminated the need to file an informal application to specify new AM station directional antenna field monitoring points. Revised section 73.3538(b) requires a broadcast station to file an informal application to modify or discontinue the obstruction marking or lighting of an antenna supporting structure. The requirement to file an informal application to relocate the main studio outside the principal community contour has approval under section 73.1125 (3060-0171). The data are used by FCC staff to ensure that the modification or discontinuance of the obstruction marking or lighting will not cause a menace to air navigation.

OMB Number: 3060-0449.

This information enables the Commission to determine whether broadcast permittees and licensees maintain the requisite character qualifications to be a broadcast permittee or licensee during their license term.

OMB Approval Number: 3060-0357.

Title: Section 63.701 Requests for Designation as a Recognized Private Operating Agency.

Total Annual Burden: 35 hours.

Needs and Uses: The Commission requests this information in order to make recommendations to the United States Department of State for granting recognized private operating agency (RPOA) status to requesting entities. The Commission does not require entities to request RPOA status. Rather, this is a voluntary application process for use by companies that believe that obtaining RPOA status will be beneficial in persuading foreign governments to allow them to conduct business abroad. RPOA status also permits companies to join the International Telecommunication Union's (ITU's) Telecommunications Sector, which is the standards-setting body of the ITU. The information furnished in RPOA requests is collected pursuant to section 63.701 of the Commission rules.

OMB Approval Number: 3060-0184.

Title: Section 73.1740 Minimum Operating Schedule.

Estimated Total Annual Burden: 184 hours.

Needs and Uses: Section 73.1740 requires licensees of commercial broadcast stations to notify the FCC in Washington, DC, when events beyond their control make it impossible to continue operation or to adhere to the required operating schedules set forth in this section. In addition, the FCC must be notified when normal operation is resumed. No further authority is needed for limited operation or discontinued operation for a period not exceeding 30 days. Should events beyond the licensees control make it impossible for compliance within the required 30-day time period, an informal written request shall be submitted to the FCC requesting the amount of additional time that the

licensee deems necessary. The data are used by FCC staff to authorize temporarily a limited operation or a discontinuance of operation.
