

of intent to participate. The required contents of the notice of intent to participate are set forth at 19 CFR 351.218(d)(1)(ii). In accordance with the Department's regulations, if we do not receive a notice of intent to participate from at least one domestic interested party by the 15-day deadline, the Department will automatically revoke the order without further review.⁶

If we receive an order-specific notice of intent to participate from a domestic interested party, the Department's regulations provide that *all parties* wishing to participate in a Sunset Review must file complete substantive responses not later than 30 days after the date of publication in the **Federal Register** of this notice of initiation. The required contents of a substantive response, on an order-specific basis, are set forth at 19 CFR 351.218(d)(3). Note that certain information requirements differ for respondent and domestic parties. Also, note that the Department's information requirements are distinct from the Commission's information requirements. Consult the Department's regulations for information regarding the Department's conduct of Sunset Reviews. Consult the Department's regulations at 19 CFR part 351 for definitions of terms and for other general information concerning antidumping and countervailing duty proceedings at the Department.

This notice of initiation is being published in accordance with section 751(c) of the Act and 19 CFR 351.218(c).

Dated: July 28, 2016.

Christian Marsh,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Pacific Coast Groundfish Fishery Rationalization Social Study.
OMB Control Number: 0648-0606.

Form Number(s): None.

Type of Request: Regular (request for extension of a currently approved information collection).

Number of Respondents: 460.

Average Hours per Response: 30 minutes.

Burden Hours: 143.

Needs and Uses: This request is for revision and extension of a currently approved information collection. The revision consists of minor changes to the information collection tool.

Historically, changes in fisheries management regulations have been shown to result in impacts to individuals within the fishery. An understanding of social impacts in fisheries—achieved through the collection of data on fishing communities, as well as on individuals who fish—is a requirement under several federal laws. Laws such as the National Environmental Protection Act and the Magnuson Stevens Fishery Conservation Act (as amended 2007) describe such requirements. The collection of this data not only helps to inform legal requirements for the existing management actions, but will inform future management actions requiring equivalent information.

Literature indicates fisheries rationalization programs have an impact on those individuals participating in the affected fishery. The Pacific Fisheries Management Council implemented a rationalization program for the Pacific Coast Groundfish limited entry trawl fishery in January 2011. This research aims to continue to study the individuals in the affected fishery over the long term. Data collection will shift from a timing related to changes in the catch share program design elements to a five-year cycle. In addition, the study will compare results to previous data collection efforts in 2010, 2012, and 2015/2016. The data collected will provide updated and more comprehensive descriptions of the industry as well as allow for analysis of changes the rationalization program may create in the fishery. The measurement of these changes will lead to a greater understanding of the social impacts the management measure may have on the individuals in the fishery. To achieve these goals, it is critical to continue data collection for comparison to previously collected data and establish a time-series which will identify changes over the long term. Analysis can also be correlated with any regulatory adjustments due to the upcoming five-year review of the program. This study will continue data collection efforts to achieve the stated objectives.

Affected Public: Business or other for-profit organizations; not-for-profit institutions; individuals or households.

Frequency: Intermittently (every 2–3 years).

Respondent's Obligation: Voluntary.

This information collection request may be viewed at reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to OIRA_Submission@omb.eop.gov or fax to (202) 395-5806.

Dated: July 26, 2016.

Sarah Brabson,

NOAA PRA Clearance Officer.

RIN 0648-XD740

Endangered and Threatened Wildlife and Plants; Notice of 12-Month Finding on Petitions To List Porbeagle Shark as Threatened or Endangered Under the Endangered Species Act (ESA)

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; 12-month finding and availability of status review document.

SUMMARY: We, the National Marine Fisheries Service, have completed a comprehensive status review under the Endangered Species Act (ESA) for porbeagle shark (*Lamna nasus*) in response to petitions to list this species. Based on the best scientific and commercial information available, including the status review report (Curtis *et al.*, 2016), and taking into account ongoing efforts to protect these species, we have determined that porbeagle sharks do not warrant listing at this time. This review identified two Distinct Population Segments (DPS)—North Atlantic and Southern Hemisphere—of porbeagle sharks. We conclude that neither is currently in danger of extinction throughout all or a significant portion of its range or likely to become so in the foreseeable future. We also conclude that the species itself is not currently in danger of extinction throughout all or a significant portion of
