

Preliminary Determinations

NMFS has preliminarily determined that the impact of construction of the Neptune Port Project may result, at worst, in a temporary modification in behavior of small numbers of certain species of marine mammals that may be in close proximity to the Neptune LNG facility and associated pipeline during its construction. These activities are expected to result in some local short-term displacement, resulting in no more than a negligible impact on the affected species or stocks of marine mammals. The provision requiring that the activity not have an unmitigable adverse impact on the availability of the affected species or stock for subsistence use does not apply for this proposed action.

This preliminary determination is supported by measures described earlier in this document under "Marine Mammal Mitigation, Monitoring, and Reporting" and MARAD's Record of Decision (and NMFS' Biological Opinion on this action). As a result of the described mitigation measures, no take by injury or death is requested, anticipated, or proposed to be authorized, and the potential for temporary or permanent hearing impairment is very unlikely due to the relatively low noise levels (and consequently small zone of impact). The likelihood of such effects would be avoided through the incorporation of the proposed shut-down mitigation measures mentioned in this document. While the number of marine mammals that may be harassed will depend on the distribution and abundance of marine mammals in the vicinity of the Port construction, the estimated number of marine mammals to be harassed is small.

Proposed Authorization

As a result of these preliminary determinations, NMFS proposes to issue an IHA to Neptune for the taking (by Level B harassment only) during construction of the Neptune Port provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated.
