SUPPLEMENTARY INFORMATION:

A. Background

Subpart 4.12 of the Federal Acquisition Regulation (FAR) requires prospective contractors to complete

electronic annual representations and certifications in ORCA, in conjunction with required registration in the Central Contractor Registration database. ORCA presently includes only representations and certifications required by the FAR, but is being revised to also include those required by the DFARS. This will eliminate the need for offerors to submit the same information to various DoD offices in response to individual solicitations.

Section 204.1202(2) of the proposed rule lists the existing DFARS representations and certifications that will be included in ORCA. The DFARS representations and certifications implement DoD-unique statutory requirements and trade agreements, and contain special requirements applicable to the significant number and various types of defense contracts and subcontracts performed outside the United States.

The proposed rule contains a substitute paragraph (c) for use with the provision at FAR 52.204-8, Annual Representations and Certifications, to permit the inclusion of information relating to both the FAR and the DFARS. An offeror must include information in paragraph (c) only if changes to the offeror's annual representations and certifications apply to a particular solicitation.

This rule was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

B. Regulatory Flexibility Act

DoD has prepared an initial regulatory flexibility analysis consistent with 5 U.S.C. 603. The analysis is summarized as follows:

The objective of the rule is to provide a centralized location for the representation and certification information required by the DFARS, thereby eliminating the need for offerors to submit the same information to various DoD offices in response to individual solicitations. The legal basis for the rule is 41 U.S.C. 421. The rule will apply to all entities registered in the Central Contractor Registration database. FAR 4.1102 requires that prospective contractors be registered in the database before the award of a contract or agreement, with certain exceptions. Administrative personnel that have general knowledge of the contractor's business should be able to enter the required information into the database. The rule is expected to have a positive impact on small business concerns by reducing administrative burdens.

A copy of the analysis may be obtained from the point of contact specified herein. DoD invites comments from small businesses and other interested parties. DoD also will consider comments from small entities concerning the affected DFARS subparts in accordance with 5 U.S.C. 610. Such comments should be submitted separately and should cite DFARS Case 2006–D032.

C. Paperwork Reduction Act

The information collection requirements of the representations and certifications addressed in this proposed rule that require offerors to provide specific fill-in information have been approved by the Office of Management and Budget under Control Numbers 0704–0229, 0704–0245, and 0704–0259. The proposed rule does not impose information collection requirements beyond those already required by existing DFARS representations and certifications.
