Executive Order 12866 (Regulatory Planning and Review). This notice is not a significant regulatory action under Sections 3(f)(3) and 3(f)(4) of Executive Order 12866, as it does not materially alter the budgetary impact of a grant program and does not raise novel policy issues. This notice is not an "economically significant" regulatory action under Section 3(f)(1) of the Executive Order, as it does not have an effect on the economy of \$100 million or more in any one year, and it does not have a material adverse effect on the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities.

File No. 13583: NMML conducts research on marine mammals important to the mission of the National Marine Fisheries Service (NMFS) and the National Oceanic and Atmospheric Administration (NOAA). NMML is requesting a renewal of Permit No. 782-1694 which authorizes collection of cetacean and pinniped (except for walrus) specimens from dead animals, and for import, export, and possession of specimens taken legally worldwide. Samples may be archived, transported, shared, and analyzed by researchers in order to optimize the amount of biological information gained from each animal. No takes of live animals would be authorized under this permit. There will be no non-target species taken

incidentally under this permit because the permit would only cover import, export, and possession of samples from dead animals or live animals taken legally under other permits. A permit is requested for a five-year period.

File No. 13599: The NOS Lab is requesting authorization to receive, import, export, transfer, archive, and conduct analyses of marine mammal and endangered species parts. The applicant is requesting all cetaceans, pinnipeds (except for walrus), sea turtles (in the water), smalltooth sawfish (*Pristis pectinata*), shortnose sturgeon (*Acipenser brevirostrum*) and white abalone (*Haliotis sorenseni*) under NMFS jurisdiction to be included in this permit request. No live animal takes are being requested and no incidental harassment of animals would occur. Samples would be archived at the NOS Lab and used to support law enforcement actions, research studies (primarily genetics), and outreach education. A permit is requested for five years. In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activities proposed are categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.
