A Notice of Availability of the Final RP/EIS was published in the **Federal Register** on April 14, 2017 (82 FR 17975). In the Final RP/EIS, the Alabama TIG presented its analysis of ten restoration alternatives (including the no action alternative) for addressing the loss of recreational shoreline use in Alabama as a result of the *Deepwater Horizon* oil spill and the selection of six of these alternatives for implementation.

As documented in the Record of Decision (ROD) signed on May 16, 2017, the Alabama TIG has: Reviewed the injury to natural resources and services caused by the *Deepwater Horizon* oil spill incident as outlined in the “Deepwater Horizon Oil Spill: Final Programmatic Damage Assessment and Restoration Plan (PDARP) and Final Programmatic Environmental Impact Statement (PEIS)”, specifically the injury to recreational shoreline use in Alabama; analyzed alternatives to restore that injury; considered environmental impacts associated with the restoration alternatives, including the extent to which any adverse impacts could be mitigated; considered public and agency comments; and considered the funding allocations required for restoration. Based on these considerations, the ROD presents the Alabama TIG’s decision to select

Alternatives 1, 2, 5, 6, 7 and 9 for implementation. The AL TIG also concludes that all practicable means to avoid or minimize environmental harm from the alternatives selected have been adopted, and, where consultations are currently incomplete, the AL TIG will commit to additional minimization measures in forthcoming consultations.
