

seeker with a selectable attack profile. The Harpoon Block II upgrade incorporates software and hardware changes that will add an improved Anti-Surface Warfare (ASUW) capability against ships in the open ocean and in the littoral. Harpoon Block II hardware improvements include a new Guidance Control Unit (GCU) that uses GPS aided inertial navigation. This improves the missile's overall navigation accuracy. GPS accuracy also gives Harpoon Block II an inherent secondary role against land-based targets, making Block II useful in coastal target suppression roles. Harpoon Block II software improvements includes changes to the launching system that provides the operator with the ability to superimpose a geographic coastline on the mission planning screen. This allows the user to shape the search pattern of the Harpoon seeker in ASUW mode, enhancing its performance in littoral areas. The information on the Harpoon is classified Secret.

19. The AIM-9X-2 Sidewinder missile is a 5th generation air-to-air guided missile that employs a passive infrared (IR) target acquisition system that features digital technology and micro-miniature solid-state electronics. The AIM-9X-2 AUR is Confidential, major components and subsystems range from Unclassified to Confidential, and technical data and other documentation are classified up to Secret.

This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.
