

evaluation. Because that peer review process has not yet occurred, the related cancellations can not yet be finalized.

Pursuant to the agreement, a number of registrants amended their registrations to require the addition of label statements identifying December 31, 2013 as the last date the product could be used legally on sod farms, golf courses, and highway rights-of-way. In light of the fact, as discussed in this Unit, that the cancellations of products registered for use on sod farms, golf courses, and highway rights-of-way did not become effective in 2009, and that these uses remain registered, registrants have submitted labels removing the restrictive statement prohibiting use of the product on sod farms, golf courses, and highway rights-of-way after December 31, 2013. All products with labels that include the prohibitive language must be used according to their labels. EPA intends to issue a new cancellation order when and if cancellation of these uses is proper under the terms of the agreement.

Finally, as to the uses that were cancelled in the 2009 document without regard to the conduct of a peer review of the mode of action of inorganic arsenicals, EPA is clarifying that existing stocks of products in users' hands as of December 31, 2010, containing MSMA labeled for residential; forestry; non-bearing fruit and nuts; citrus, bearing and non-bearing; bluegrass, fescue and ryegrass grown for seed; drainage ditch banks; railroad, pipeline, and utility rights-of-way; fence rows; storage yards; and similar non-crop areas and products containing DSMA, CAMA, cacodylic acid and its sodium salt, can be used legally until they are exhausted, provided that such use complies with the EPA-approved label and labeling accompanying the affected product. This was the intent of the original order, but some language in the order may have suggested incorrectly that such use of existing stocks would be terminated after December 31, 2013.

III. What does this document do?

In light of the fact that a portion of the cancellation was improperly finalized, EPA is issuing this document to alert registrants, users, and others that the cancellation of products registered for use on sod farms, golf courses, and highway rights-of-way in the 2009 document is not effective, and that the order and existing stocks provision did not go into effect on September 30, 2009. That portion of the cancellation order will not be proper until EPA has addressed in writing the recommendations of a peer review panel

pursuant to paragraph 6 of the Agreement in Principle. When and if that portion of the voluntary cancellation becomes effective, persons other than registrants will have at least six additional months to sell and distribute existing stocks of the cancelled product, and users will have at least one additional year to use existing stocks of cancelled product (provided use is consistent with the previously-approved labeling of the particular product in the users' hands).

In addition, EPA is clarifying that existing stocks of products in users' hands as of December 31, 2010, containing MSMA labeled for residential; forestry; non-bearing fruit and nuts; citrus, bearing and non-bearing; bluegrass, fescue and ryegrass grown for seed; drainage ditch banks; railroad, pipeline, and utility rights-of-way; fence rows; storage yards; and similar non-crop areas and products containing DSMA, CAMA, cacodylic acid and its sodium salt, can be used legally until they are exhausted, provided that such use complies with the EPA-approved label and labeling accompanying the affected product.
