

DEPARTMENT OF JUSTICE**Notice Lodging of Proposed Consent Decree Under the Clean Air Act**

On October 28, 2014, the Department of Justice lodged a proposed consent decree with the United States District Court for the Northern District of Ohio in the lawsuit entitled *United States v. Ross Incineration Services, Inc.*, Civil Action No. 12–01441.

The United States filed this lawsuit under the Clean Air Act. The United States' complaint seeks injunctive relief and civil penalties for violations of various provisions of the National Emission Standards for Hazardous Waste Pollutants from Hazardous Waste Combustors at defendant's hazardous waste incinerator in Grafton, Ohio. The consent decree requires the defendant to perform injunctive relief and pay a civil penalty of \$400,000.

The publication of this notice opens a period for public comment on the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States v. Ross Incineration Services, Inc.*, D.J. Ref. No. 90–5–2–1–10042. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

SUPPLEMENTARY INFORMATION: This ICR seeks OMB approval for revisions to the Annual Refiling Survey (ARS). The ARS is used in conjunction with the BLS Quarterly Census of Employment and Wages (QCEW) program. The primary purpose of the ARS is to verify or to correct the North American Industry Classification System (NAICS) code assigned to establishments as well as to obtain accurate mailing and physical location addresses of establishments. As a result, changes in the industrial and geographical compositions of the economy are captured in a timely manner and reflected in BLS statistical programs. The QCEW program provides data necessary to administer State Unemployment Insurance systems. QCEW data accurately reflect the extent of coverage of the State UI laws and are used for determining UI total and taxable wages rates and for other purposes. Federal, State, and local government officials as well as private researchers depend on accurate geographical and industrial coding based on the 2012 North American Industry Classification System Manual.

This ICR has been classified as a revision because of changes to the scope and frequency of the ARS and because of minor revisions to the notification letters and collection instruments. The DOL, in coordination with the OMB, curtailed the QCEW program through a permanent budget reduction of \$4.8 million in FY 2014. As a part of the effort to develop a reduction strategy with minimal impact on data quality, the ARS is being reduced in scope and is changing approach.

An analysis considered how frequently establishments changed their industry, location, and ownership. The analysis looked at these changes over three ARS cycles covering nine years, and it showed there were industries with low rates of change. Thus, certain NAICS industries exist that traditionally have low volatility based on factors such as infrastructure, intellectual property, or advanced degrees that make them unlikely candidates for transitioning from one industry to another. Rather than surveying one-third of businesses in these low-change industries every year, the QCEW program will survey one-sixth of these businesses each year, putting them on a six-year cycle. The six-year cycle preserves the ability to identify trends in these slow-changing industries, while reducing workload, postage, and other
