The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This ICR estimates the recordkeeping and third-party response burden of paperwork activities that covers the information collection requirements contained in the Worker Protection Standard (WPS) regulations at 40 CFR part 170. These requirements were updated in a 2015 Final Rule (80 FR 67495, November 2, 2015) that amended 40 CFR part 170.

Prior to the regulatory update, the WPS regulations already had provisions for training and notification of pesticide-related information for workers who enter pesticide-treated areas after pesticide application to perform crop-related tasks, as well as for handlers who mix, load, and apply pesticides. Agricultural employers and commercial pesticide handling establishments are responsible for providing required training, notifications and information to their employees to ensure worker and handler safety. The changes to the regulation in 2015 improved protections and included revisions to many of the provisions as well as the addition of new requirements. The WPS regulation now includes expanded and more frequent training for workers and handlers, improved posting of pesticide-treated areas, additional information for workers before they enter a pesticide-treated area while a restricted entry interval is in effect, access to more general and application-specific information about pesticides used on the establishment, and recordkeeping of training to improve enforceability and compliance.

Respondents/Affected Entities: Agricultural employers on agricultural establishments, including employers in farms as well as in nursery, forestry, and greenhouse establishments.

Respondent's obligation to respond: Mandatory (40 CFR 170).

Estimated total number of potential respondents: Approximately 985,000 agricultural establishments/employers and approximately 1,995,000 agricultural workers/handlers.

Frequency of response: Annually or on occasion, depending on the activity.
