

Recognized Testing Laboratory, subject to the limitations and conditions listed below.

Limitations

OSHA recognizes CSL for testing and certification of products to demonstrate conformance to the following five (5) test standards, one part of the NRTL's scope of recognition. OSHA's recognition also includes the site and the use of the two supplemental programs, listed above. The Agency's recognition of CSL, or any NRTL, is always limited to equipment or materials (products) for which OSHA standards require third party testing and certification before use in the workplace. As a result, OSHA's recognition of an NRTL for a test standard excludes any product(s), falling within the scope of the test standard, for which OSHA has no such requirements. OSHA has determined that the standards listed below are appropriate, within the meaning of 29 CFR 1910.7(c).

The designations and titles of the above standards were current at the time of the preparation of the notice of the preliminary finding.

Conditions

Curtis-Straus LLC. must also abide by the following conditions of the recognition, in addition to those already required by 29 CFR 1910.7:

Within 30 days of certifying its first products under the NRTL Program, CSL will notify the OSHA NRTL Program Director so that OSHA may review CSL's implementation of its procedures for testing and certification of products covered within the scope of the test standards listed above.

As part of its system for authorization or issuance of the use of its certification mark, CSL must establish, maintain, and utilize proper procedures that ensure its mark is applied only to the specific run(s) of production of the products that CSL has certified.

OSHA must be allowed access to CSL's facilities and records for purposes of ascertaining continuing compliance

with the terms of its recognition and to investigate as OSHA deems necessary;

If CSL has reason to doubt the efficacy of any test standard it is using under this program, it must promptly inform the organization that developed the test standard of this fact and provide that organization with appropriate relevant information upon which its concerns are based;

CSL must not engage in or permit others to engage in any misrepresentation of the scope or conditions of its recognition. As part of this condition, CSL agrees that it will allow no representation of its recognition as a Nationally Recognized Testing Laboratory (NRTL) by OSHA without clearly indicating the specific equipment or material to which this recognition is tied, or that its recognition is limited to certain types of products;

CSL must inform OSHA as soon as possible, in writing, of any change of ownership, facilities, or key personnel, and of any major change in its operations as an NRTL, including details;

CSL will continue to meet all the terms of its recognition and will always comply with all OSHA policies pertaining to this recognition;

CSL will continue to meet the requirements for recognition in all areas where it has been recognized; and

CSL will always cooperate with OSHA to assure compliance with the spirit as well as the letter of its recognition and 29 CFR 1910.7.

Signed at Washington, D.C. this 21st day of April, 2000.

Charles N. Jeffress,
Assistant Secretary.
