

open to all students. The Secretary has set three performance indicators to measure this goal: (1) The number of States, including the District of Columbia and Puerto Rico, with charter school laws, (2) the number of charter schools in operation around the Nation, and (3) the percentage of charter school students who are achieving at or above the proficient level on State examinations in mathematics and reading. Additionally, the Secretary has established the following measure to examine the efficiency of the CSP: Federal cost per student in implementing a successful school (defined as a school in operation for three or more consecutive years).

These measures constitute the Department's indicators of success for these programs. Consequently, we advise an applicant for a grant under these programs to give careful consideration to these measures in conceptualizing the approach and evaluation for its proposed project. Each grantee will be required to provide, in its annual performance and final reports, data about its progress in meeting these measures.

On August 13, 2001, in Order No. EA-212-A, DOE renewed that authorization for a two-year term. On July 8, 2002, Coral filed an application with DOE to amend the existing export authorization contained in Order No. EA-212-A to add a list of authorized export points. A final decision will be made on this application after the environmental impacts have been evaluated pursuant to the National Environmental Policy Act of 1969, and a determination is made by the DOE that the proposed action will not adversely impact on the reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above or by accessing the
