

treated and all commodities contain residues at predicted day zero levels. For this screening level assessment with an application rate of 3 pounds ATBC or TEC per acre, the following 0–time level residues are predicted from the nomogram: leafy vegetables–375 ppm, legume vegetables–36 ppm, fruiting vegetables, cucurbit vegetables, citrus fruits, pome fruits, stone fruits, berries, cereal grains, grapes, and bananas–21 ppm.. Using the above modeling parameters, chronic exposure was estimated for the overall U.S.

population and 25 population subgroups. Chronic exposure for the overall U.S. population was estimated to be 0.492873 mg/kg bwt/day, representing 4.9% of the RfD. The exposure estimate for the most highly exposed population subgroup, children 1–6 years of age, was 0.984312 mg/kg bwt/day, or 9.8%.

ii. *Drinking water.* Based upon the chemical and physical properties, and the environmental fate characteristics, ATBC and TEC are not expected to persist environmentally, nor result in significant concentrations in drinking water sources.

2. *Non-dietary exposure.* ATBC and TEC are currently used in non-food use pesticide formulations, as well as in food, food packaging, cosmetics, medical devices and pharmaceuticals, and as plasticizers.

D. Cumulative Effects

Cumulative effects are not expected since ATBC and TEC are rapidly degraded to natural substances.

E. Safety Determination

1. *U.S. population.* Based upon the dietary residue exposure analysis using the Kenega nomogram, the most sensitive population, children 1–6 years, was 0.984312 mg/kg bwt/day or 9.8% of the RfD for the crops and crop groups used in this assessment. Results of a 2–generation reproduction study with ATBC did not reveal developmental or reproduction effects at doses up to 100 mg/kg bwt/day. Also, based on the absence of pup toxicity up to the dose level (1,000 mg/kg bwt/day) producing maternal effects, there is no evidence of special post-natal sensitivity to infants and children. It is concluded that there is reasonable certainty that no harm will result to infants and children from aggregate exposure to acetyl tributyl citrate (ATBC) or triethyl citrate (TEC) when used as inert ingredients in agricultural formulations of pesticides.

2. *Infants and children.* No embryotoxic, developmental, or teratogenic effects have been associated

with acetyltributyl citrate (ATBC) or triethyl citrate (TEC).

F. International Tolerances

Morflex Inc. is unaware of any International tolerances or CODEX maximum residue limits (MRL's) for acetyltributyl citrate (ATBC) or triethyl citrate (TEC) on any crop or livestock commodities.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–6930–2]

Notice of Tentative Approval, Request for Comments and Solicitation of Requests for a Public Hearing for Public Water System Supervision Program Revision for the Commonwealth of Virginia

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Tentative Approval and Solicitation of Requests for a Public Hearing.

SUMMARY: Notice is hereby given in accordance with the provision of section 1413 of the Safe Drinking Water Act as amended, and the rules governing National Primary Drinking Water Regulations that the Commonwealth of Virginia has revised its approved Public Water System Supervision Primacy Program. Specifically, Virginia has adopted Consumer Confidence Report regulations requiring annual drinking water quality reports from community water suppliers. EPA has determined that these regulations are no less stringent than the Federal provisions and satisfy the requirements of the Federal regulations. Therefore, EPA has decided to tentatively approve the program revisions. All interested parties are invited to submit written comments on this determination and may request a public hearing.

DATES: Comments or a request for a public hearing must be submitted by February 5, 2001. This determination shall become effective on February 5, 2001 if no timely and appropriate request for a hearing is received and the Regional Administrator does not elect to hold a hearing on his own motion, and if no comments are received which cause EPA to modify its tentative approval.

ADDRESSES: Comments or a request for a public hearing must be submitted to Patti Kay Wisniewski, Drinking Water Branch (3WP22), U.S. Environmental

Protection Agency Region III, 1650 Arch Street, Philadelphia, PA 19103–2029.

All documents relating to this determination are available for inspection between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, at the following offices:

- Drinking Water Branch, Water Protection Division, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103–2029; and
- Virginia Department of Health, Division of Water Supply Engineering, 1500 East Main Street, Richmond, Virginia 23218.

FOR FURTHER INFORMATION CONTACT: Patti Kay Wisniewski at the Philadelphia address given above; telephone (215) 814–5668 or fax (215) 814–2318.

SUPPLEMENTARY INFORMATION: All interested parties are invited to submit written comments on this determination and may request a public hearing. All comments will be considered, and, if necessary, EPA will issue a response. Frivolous or insubstantial requests for a hearing may be denied by the Regional Administrator. However, if a substantial request for a public hearing is made by February 5, 2001, a public hearing will be held. A request for public hearing shall include the following: (1) The name, address, and telephone number of the individual, organization, or other entity requesting a hearing; (2) a brief statement of the requesting person's interest in the Regional Administrator's determination and of information that the requesting person intends to submit at such a hearing; and (3) the signature of the individual making the request; or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

Dated: December 27, 2000.

Bradley M. Campbell,

Regional Administrator, EPA, Region III.
