

Section 87.147 is needed to require applicants for aviation equipment certification to submit a Federal Aviation Administration (FAA) determination of the equipment's compatibility with the National Airspace System (NAS). This will ensure that radio equipment operating in certain frequencies is compatible with the NAS, which shares system components with the military. The notification must describe the equipment, give the manufacturer's identification, antenna characteristics, rated output power, emission type and characteristics, the frequency or frequencies of operation, and essential receiver characteristics if protection is required. The information is used by FCC engineers to determine the interference potential of the proposed operation.
