OMB Control Number: 1024-0126.

Title: Proposed Sale of Concession Operations, 36 CFR 51, Subpart J.

Form(s): None.

Type of Request: Extension of a currently approved collection of information.

Abstract: The NPS authorizes private businesses known as concessioners to provide necessary and appropriate

visitor facilities and services in areas of the National Park System. Concession authorizations may be assigned, sold, transferred, or encumbered by the concessioner subject to prior written approval of the NPS. The NPS requires that certain information be submitted for review prior to the consummation of any sale, transfer, assignment, or encumbrance.

The information requested is used to determine whether or not the proposed transaction will result in an adverse impact on the protection, conservation, or preservation of the resources of the unit of the National Park System; decreased services to the public; the lack of a reasonable opportunity for profit over the remaining term of the authorization; or rates in excess of approved rates to the public. In addition, pursuant to the regulations at 36 CFR Part 51, the value of rights for intangible assets such as the concession contract, right of preference in renewal, user days, or low fees, belongs to the Government. If any portion of the purchase price is attributable either directly or indirectly to such assets, the transaction may not be approved. The amount and type of information to be submitted varies with the type and complexity of the proposed transaction. Without such information, the NPS would be unable to determine whether approval of the proposed transaction would be adequate.

Estimated total annual responses: 20.

Estimated average completion time per response: 80 hours.

Estimated annual reporting burden: 1,600 hours.

Estimated annual nonhour cost burden: \$5,000.

Comments are invited on: (1) The practical utility of the information being gathered; (2) the accuracy of the burden hour estimate; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden to respondents, including use of automated information collection techniques or other forms of information technology. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to

withhold your personal identifying information from public review, we cannot guarantee that OMB will be able to do so.

SUPPLEMENTARY INFORMATION:

Introduction

With this notice we continue the CCP process for Bayou Sauvage NWR. We started the process through a notice in the **Federal Register** on May 16, 2008 (72 FR 27585).

Background

The CCP Process

The National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd-668ee) (Improvement Act), which amended the National Wildlife Refuge System Administration Act of 1966, requires us to develop a CCP for each national wildlife refuge. The purpose for developing a CCP is to provide refuge managers with a 15-year plan for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation, wildlife photography, and environmental education and interpretation. We will review and update the CCP at least every 15 years in accordance with the Improvement Act.

Bayou Sauvage NWR is in eastern Orleans Parish, Louisiana, and is entirely situated within the corporate limits of the city of New Orleans. It is the largest national wildlife refuge in an urban area of the United States, and is one of the last remaining marsh areas adjacent to the south shores of Lakes Pontchartrain and Borgne. The refuge consists of 24,000 acres of wetlands and is bordered on three sides by water: Lake Pontchartrain on the north, Chef Menteur Pass on the east, and Lake Borgne on the south. The western side of the refuge is bordered by the Maxent Canal and lands that consist of bottomland hardwood habitat and exotic species, such as Chinese tallow and china berry. Un-leveed portions of the refuge consist of estuarine tidal marshes and shallow water. The Hurricane Protection Levee System, along with roadbeds, created freshwater impoundments, which altered the plant communities as well as the fish communities within these impoundments. Small forested areas exist on the low, natural ridges formed along natural drainages and along manmade canals.

CCP Alternatives, Including our Proposed Alternative

We developed three alternatives for managing the refuge and chose Alternative B as the proposed alternative. A full description is in the Draft CCP/EA. We summarize each alternative below.
