[Project No. 14515-000]

Fall River Valley Community Service District; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On April 22, 2013, Fall River Valley Community Service District filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the

feasibility of the Old Cow Creek Open-Channel Hydro Project (Old Cow Creek Project or project) to be located on Old Cow Creek, near Whitmore, California. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) A diversion intake on Old Cow Creek located just above Pacific Gas & Electric Company's (PG&E) existing diversion; (2) a new 100 cubic feet per second canal that would run parallel to PG&E's existing 3-mile long canal; (3) a powerhouse located adjacent to the existing PG&E powerhouse; (4) two 3 MW conventional hydroelectric turbines, and; (5) appurtenant facilities. The estimated average generating capacity of the project would be 31 gigawatt hours.

Applicant Contact: Mr. David Hall, Fall River Valley Community Service District, P.O. Box 427, Fall River Mills, CA 96208, Telephone (530) 336-5263.
