

Ford additionally argues that a significant portion of paragraph S4.1(k) appears to address a concern with proper installation of aftermarket seat belts into vehicles that were not originally equipped with these restraints. Ford also notes that SAE J800c which is cited in the regulation involves installation of "universal type seat belt assemblies," particularly where no seat belt had previously been installed, and that these concerns do not apply to the service seat belts. The vehicles involved in this petition have uniquely designed seat belt components and replacement seat belt assemblies are installed into the identical location from which the original parts were removed.

Ford also states that proper seat belt usage instructions are clearly explained in the Owner Handbook that is included with each new vehicle. Information concerning maintenance, periodic inspection for wear and function of the seat belts, as well as for their proper usage is included in the vehicle Owner Handbook and this information equally applies to replacement seat belt assemblies. Many Jaguar and Land Rover Owner Handbooks are also available to the public, free of charge on the Jaguar and Land Rover (GTR) Web sites.

Ford is not aware of any customer or field reports of service seat belt assemblies being incorrectly installed in the subject applications as a result of installation instructions not accompanying the service part. Ford also is not aware of any reports requesting installation instructions.

Ford also informed NHTSA that it has corrected the problem that caused these errors so that they will not be repeated in future production.

In summation, Ford states that it believes that because the noncompliances are inconsequential to motor vehicle safety that no corrective action is warranted.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance.

#### **SUPPLEMENTARY INFORMATION:**

##### **Background**

Under 49 U.S.C. 30141(a)(1)(B), a motor vehicle that was not originally manufactured to conform to all applicable FMVSS, and has no substantially similar U.S.-certified counterpart, shall be refused admission into the United States unless NHTSA has decided that the motor vehicle has safety features that comply with, or are capable of being altered to comply with, all applicable FMVSS based on destructive test data or such other evidence as NHTSA decides to be adequate.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR Part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition.

At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

101 Innovations, LLC, of Ferndale, Washington (101 Innovations)(Registered Importer 07–350) has petitioned NHTSA to decide whether nonconforming 1988–1994 ALPINA B12 5.0 model passenger cars are eligible for importation into the United States. 101 Innovations believes that these vehicles are capable of being modified to meet all applicable FMVSS.

In its petition, 101 Innovations stated its belief that nonconforming 1988–1994 ALPINA B12 5.0 model passenger cars are substantially similar to both the U.S. version 1988–1994 BMW 7-series (e32) passenger cars and the nonconforming 1988–1994 BMW 7-series (e32) passenger cars that are eligible for importation by Registered Importers under vehicle eligibility number VSP–299 and VSA–28. 101 Innovations explained that the subject 1988–1994 ALPINA B12 5.0 model passenger cars were originally manufactured by BMW as 7-series (e32) passenger cars and were subsequently altered by ALPINA Burkard Bovensiepen GmbH. 101 Innovations additionally explained that ALPINA Burkard Bovensiepen GmbH assigned new VINs to the altered vehicles prior to the vehicles being sold as ALPINA brand vehicles in Europe and other regions outside of the United States. While there may be similarities between the 1988–1994 ALPINA B12 5.0 model passenger cars and the 1988–1994 BMW 7-series (e32) passenger cars that BMW has manufactured for importation into and sale in the United States, NHTSA has decided that due to the vehicle and VIN alterations, the 1988–1994 ALPINA B12 5.0 model passenger cars cannot be regarded as substantially similar to 1988–1994 BMW 7-series (e32) passenger cars for the purpose of establishing import eligibility under section 30141(a)(1)(A). Therefore, we will construe 101 Innovation's petition as a petition pursuant to 49 U.S.C. 30141(a)(1)(B), seeking to establish import eligibility for the 1988–1994 ALPINA B12 5.0 model passenger cars on the basis that they have safety features that comply with, or are capable of being modified to comply with, the FMVSS based on destructive test data or such other evidence that NHTSA decides to be adequate.

101 Innovations submitted information with its petition intended to demonstrate that non-U.S. certified 1988–1994 ALPINA B12 5.0 model

passenger cars conform to many FMVSS and are capable of being altered to comply with all other standards to which they were not originally manufactured to conform.

Specifically, the petitioner claims, based on a comparison with the U.S. certified 1988–1994 BMW 7-series (e32) passenger cars, that non-U.S. certified 1988–1994 ALPINA B12 5.0 model passenger cars, as originally manufactured, conform to: Standard Nos. 102 *Transmission Shift Lever Sequence, Starter Interlock, and Transmission Braking Effect*, 103 *Windshield Defrosting and Defogging Systems*, 104 *Windshield Wiping and Washing Systems*, 105 *Hydraulic Brake Systems*, 106 *Brake Hoses*, 107 *Reflecting Surfaces*, 109 *New Pneumatic Tires*, 113 *Hood Latch System*, 116 *Motor Vehicle Brake Fluids*, 124 *Accelerator Control Systems*, 201 *Occupant Protection in Interior Impact*, 202 *Head Restraints*, 204 *Steering Control Rearward Displacement*, 205 *Glazing Materials*, 206 *Door Locks and Door Retention Components*, 207 *Seating Systems*, 210 *Seat Belt Assembly Anchorages*, 211 *Wheel Nuts, Wheel Discs and Hub Caps*, 212 *Windshield Mounting*, 214 *Side Impact Protection*, 216 *Roof Crush Resistance*, 219 *Windshield Zone Intrusion*, 301 *Fuel System Integrity*, and 302 *Flammability of Interior Materials*.

In addition, the petitioner claims that the vehicles comply with the Bumper Standard found in 49 CFR part 581.

The petitioner also contends that the vehicles are capable of being altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays*: Installation of U.S.-model instrument cluster and U.S.-version software.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment*: Installation of U.S.-model: (a) Headlamps; (b) front and rear side marker lamps; and (c) rear high mounted stop lamp and associated wiring.

Standard No. 110 *Tire Selection and Rims*: Installation on the vehicle of a tire information placard.

Standard No. 111 *Rearview Mirrors*: Installation of a U.S.-model passenger side rearview mirror, or inscription of the required warning statement on the face of that mirror.

Standard No. 114 *Theft Protection*: Installation of U.S.-version software and a U.S.-model ignition switch to meet the requirements of this standard.

Standard No. 115 *Vehicle Identification*: Installation of a vehicle identification plate near the left

windshield post to meet the requirements of this standard.

**Standard No. 118 Power-Operated Window, Partition, and Roof Panel Systems:** Inspection of all vehicles and modification or deactivation of any remote activation features that cause the system not to conform to the standard.

**Standard No. 208 Occupant Crash Protection:** (a) Installation of U.S.-model knee bolsters; and (b) inspection of all vehicles and replacement of any non U.S.-model air bag system components, including all warning systems, warning labels and telltales, with U.S.-model components on vehicles not already so equipped.

**Standard No. 209 Seat Belt Assemblies:** Inspection of all vehicles and replacement of any non U.S.-model seat belt components on vehicles not already so equipped.

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above addresses both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.
