SUPPLEMENTARY INFORMATION:

Request for Emergency Clearance for Data Collection in Support of a Cross-Site Evaluation of National Science Foundation's Directorate for Education and Human Resources the Cross-Project Evaluation of the National Science Foundation's Local Systemic Change Through Teacher Enhancement Program (LSC)

OMB Approval Number: OMB 3145-0161.

Expiration Date: Not applicable.

Abstract: The National Science Foundation (NSF) requests a six-month extension for surveys in the Local Systemic Change (LSC) through Teacher Enhancement Program which was previously approved through September 2001 (OMB No. 3145-0136). The

surveys are part of the ongoing data collection for the program-wide evaluation of the LSC. Each of the 72 currently funded projects administers teacher and principal questionnaires and conducts teacher interviews at appropriate times during the school year based on the program evaluation design. A disruption in the data collection process would jeopardize the completion of the annual report NSF needs in order to provide programmatic impact information to Congress as well as planned longitudinal analyses.

These surveys have been ongoing for a number of years in LSC projects funded by NSF. The LSC program is a large-scale effort to modify the nature of teacher in-service training (or professional development) provided to mathematics and science teachers in a large number of school districts across the country. Currently there are 72 projects funded at up to \$6 million each. The database maintained by Horizon Research, Inc. for LSC is designed to provide information on the total system, both for accountability and for judging effectiveness. For example, NSF is required to report for GPRA the number of teachers receiving NSF in-service and development support. This information is gathered through this recurring study of the LSC projects.

Respondents: Individuals or households, and not-for-profit institutions.

Number of Respondents: 14,760.

Burden on the Public: 4,950 hours.

Dated: November 2, 2001.

NSF Reports Clearance Officer.
