

proposed facilities would disturb about 12,000 acres of land. Of the 12,000 acres, about 8,000 acres would be temporarily disturbed and about 4,000 acres would be permanently maintained for operation of the pipeline within a 50-foot-wide permanent right-of-way and as aboveground facility sites. Following construction, all temporary workspaces would be restored and allowed to revert to former use. About 60 percent of the proposed route would cross federally administered land managed by the BLM or USFS.

The EIS Process

The FERC will be the lead federal agency for the preparation of the EIS. As noted above, the BLM and USFS will be cooperating agencies. NEPA requires the FERC to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity under Section 7 of the Natural Gas Act. NEPA also requires us to identify and address concerns the public may have about proposals. This is the "scoping" process referred to earlier. The main goal of the scoping process is to focus the analysis in the EIS on important environmental issues and reasonable alternatives. By this Notice, we are requesting agency and public comments on the scope on the issues to be addressed in the EIS. All comments received will be considered during the preparation of the EIS.

We have already started to meet with Ruby personnel, agencies, and other interested stakeholders to discuss the project and identify issues/impacts and concerns. Between February 19 and March 18, 2008, representatives of FERC staff participated in public open houses sponsored by Ruby in the project area. FERC staff explained the NEPA environmental review process to interested stakeholders and noted comments related to the project.

Our independent analysis of the issues will be included in a draft EIS. The draft EIS will be mailed to federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; affected landowners; other interested parties; local libraries and newspapers; and the FERC's official service list for this proceeding. A comment period will be allotted for review of the draft EIS. We will consider all timely comments on the draft EIS and revise the document, as necessary, before issuing a final EIS.

Public Participation

You are encouraged to become involved in this process and provide

your specific comments or concerns about Ruby's planned project. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. The more specific your comments, the more useful they will be. If you wish to mail comments, please carefully follow these instructions:

- Send an original and two copies of your letter to:
Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE.; Room 1A, Washington, DC 20426.
- Label one copy of your comments for the attention of Gas 1, DG2E; and
- Reference Docket No. PF08-9-000 on the original and both copies.
- Mail your comments so that they will be received in Washington, DC, on or before April 30, 2008.

The Commission encourages electronic filing of comments. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Internet Web site at <http://www.ferc.gov> under the link to "Documents and Filings" and "eFiling." eFiling is a file attachment process and requires that you prepare your submission in the same manner as you would if filing on paper, and save it to a file on your computer's hard drive. New eFiling users must first create an account by clicking on "Sign up" or "eRegister." You will be asked to select the type of filing you are making. This filing is considered a "Comment on Filing." In addition, there is a "Quick Comment" option available, which is an easy method for interested persons to submit text only comments on a Project. The Quick-Comment User Guide can be viewed at www.ferc.gov/docs-filing/efiling/quick-comment-guide.pdf. Quick Comment does not require a FERC eRegistration account; however, you will be asked to provide a valid e-mail address. All comments submitted under either eFiling or the Quick Comment option are placed in the public record for the specified docket or Project number(s). Comments submitted electronically must be submitted by April 30, 2008.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Petroleum Refineries, published at 40 CFR part 63, subpart CC, were proposed on July 15, 1994, and promulgated on August 18, 1995. These regulations apply to the following existing and new petroleum refining process units and emission points located at refineries that are major sources of hazardous air pollutants (HAPs): Miscellaneous process vents, storage vessels, wastewater streams and treatment operations, equipment leaks, gasoline loading racks, and marine vessel loading operations. These regulations also apply to storage vessels and equipment leaks associated with bulk gasoline terminals or pipeline breakout stations that are related to an affected petroleum refinery. New facilities include those that commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart CC.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all
