Abstract: The Rural Utilities Service's (RUS) Distance Learning and Telemedicine (DLT) Loan and Grant program provides loans and grants for advanced telecommunications services to improve rural areas' access to educational and medical services. The various forms and narrative statements required are collected from the applicants (rural community facilities, such as schools, libraries, hospitals, and medical facilities, for example). The purpose of collecting the information is to determine such factors as eligibility of the applicant; the specific nature of the proposed project; the purposes for which loan and grant funds will be used; project financial and technical feasibility; and, compliance with applicable laws and regulations. In addition, for grants funded pursuant to the competitive evaluation process, information collected facilitates RUS' selection of those applications most consistent with DLT goals and objectives in accordance with the authorizing legislation and implementing regulation.
